Case study

16% Increase in ACV with Personalization & Unification of Digital Commerce Experience using Conga

Insight

A global leader offering network security, endpoint security, secure Wi-Fi, multi-factor authentication, and network intelligence, recorded a surge in website traffic and was keen to optimize the user experience on the website.

Forsys collaborated with Conga to design and implement the Digital Commerce solution for the client, which improved the browsing and checkout experience, amplified higher revenue per annum, maximized margins, increased overall and repeat customers, and accelerated renewals. The E2E solution increased customer lifetime value by 23% and market share by 19%, improved customer retention by 18%, grew average contract value (ACV) by 16%, and boosted upsell and cross-sell opportunities by 30%.

Business Challenge

As a trusted and leading Internet security solutions provider, the client received a sizable number of guest visitors daily to purchase renewal licenses. Their current platform failed to support guest browsing or guest checkout capabilities.

The challenges faced by the client:

- Poor checkout experience
- No option to save selections, billing addresses, and postal codes.
- Disjointed invoice structure.
- Manual & uncoordinated payment processes.

Transformation Journey

Forsys designed, developed, and implemented a tailor-made approach to deploy Conga Digital Commerce.

The notable highlights of the deployment journey:

- **Set up and execution of technical delivery process - JIRA for project management, SVN to store software versioning and revision control, maintenance of current and historical versions of source code built during the build phase, and implementation of Jenkins between the SVN(repository) and the testing environment to ensure continuous testing.**
- **Integration of Avalara, cloud-based tax compliance solutions, and CyberSource, payment gateway.**
- **Designing and deployment of a governance model to maintain on-time delivery.**

Impact

After the project went live, the client:

- Increase in customer lifetime value by 23%.
- Surge in upsell and cross sell opportunities by 30%.
- Improvement in market share by 19%.
- Revenue growth per annum & higher profit margins.
- Rise in customer retention by 18%.
- Unification & personalization of customer experience.
- Jump in ACV by 16%.

About the Client

The client is a global leader in network security, endpoint security, secure Wi-Fi, multi-factor authentication, and network intelligence. The company's award-winning products and services are trusted around the world by more than 18,000 security resellers and service providers to protect more than 250,000 customers. The company is headquartered in Washington, with offices across North America, Europe, Asia Pacific, and Latin America.
