Case study

FORSYS
Forward Thinking

28% Reduction in Complete Sales Cycle Process Leading to Higher Efficiencies with Automation of Sales Processes

Insight

A leading multinational industrial manufacturing company manually created quotes, and tracked product and pricing information. This resulted in error-prone quotes, leading to delays and cost escalation.

Forsys transformed and enhanced the client's processes and supporting technologies to streamline, simplify, and standardize the sales processes. It enabled them to incorporate products, pricing schedules, and integrate with Salesforce CRM, and five other IT environments, which resulted in 28% decline in the sales cycle and 17% improvement in the lead conversion rate.

Business Challenge

The client, offering 200,000 products, 1,000 price books, 20 languages, 53 currencies, and 7 IT integration touchpoints, lost business due to error-prone quotes and a lack of unification and standardization across the enterprise.

The critical challenges faced by the client:

- Frequent order errors.
- Inadequate process and pricing guidance control
- Complex product and pricing.
- Inconsistent discounting and random price books.
- Negligible up-sell identification
- Absence of real-time insight and analytics

Transformation Journey

Forsys deployed SAP CPQ (earlier CalldiusCloud) for the client.

The key highlights of the transformation journey are:

- Implemented and configured SAP CPQ
- Integrated SAP CPQ with 5 different environments
- Launched quote approval process and multiple discounts types
- Allowed quote versioning and product configuration
- Seamlessly migrated customer data

Impact

After the project went live, the client:

- Witnessed 26% more sales reps achieved their quota
- Recorded 17% higher lead conversion rate.
- Reduced sales cycle by 28%
- Lowered approvals' wait time by 95%
- Improved and reduced quoting process.
- Increased sales pipeline transparency & reduced order leakages.
- Improved average order margin.
- Stabilized order accuracy across all business locations.

About the Client

The client is a Sweden-based multinational industrial company. As a world-leading manufacturer of compressors, vacuum solutions, generators, pumps, power tools and assembly systems that can be found everywhere, the company caters to customers across 180 countries, leveraging a robust employee base of over 40,000 employees. The global organization has been turning industrial ideas into business-critical benefits since 1873.

Solution Components

SAP/CallidusCloud CPQ, Salesforce CRM, JIRA
