Case Study

30% Reduction in Testing Cycle with Process Stabilization & Standardization using Managed Services

INSIGHT

For a prominent healthcare solution provider, maintaining profitable growth was a constant struggle. The frequent testing defects caused business process instability and productivity loss. Their goal to standardize the testing procedure hit a roadblock due to lack of QA expertise and dedicated resources.

Forsys used a seamless and cost effective approach to deliver managed testing services to the client, which included identifying the test coverage, E2E analyzing the gap areas, designing the business cases, standardizing the manual testing processes, and defining and designing the manual testing roadmap. This enabled the client to reduce the testing cycle by 30%, and improve productivity and business efficiency.

BUSINESS CHALLENGE

For the client, identifying the testing gaps and risks was critical because protecting brand value and reputation, and improving process efficiency depended on them.

The main challenges for the client:

- Stabilization of the testing processes.
- High IT operation costs, including development, testing, maintenance, and infrastructure support.
- Service model flexibility and agility.

TRANSFORMATION JOURNEY

Forsys conducted a comprehensive analysis of the client's requirements, gained complete business understanding, designed the solution approach, and offered managed testing services.

The key highlights of the approach to the solution are:

- E2E assessment and analysis, including identifying the complete test coverage, gap analysis, tool exploration, action plans, and business case development.
- Strategization & execution roadmap of manual testing.
- Recognizing the entrance and exit criteria for QA and UAT teams.
- Identification of tools to author the test scripts, execute scripts, and track & report defects.
- Creation of test execution closure reports.

IMPACT

30% reduction in E2E testing cycle

Faster ticket resolution.

Cost reduction on the entire testing delivery.

Improvement in productivity and business efficiency.

ABOUT THE CLIENT

The client is a leading healthcare platform that leverages advanced analytics, technology, and nationwide healthcare provider networks to create and power value-based payment programs. Their solutions support value-based payment programs by aligning financial incentives around outcomes and providing tools to health plans and healthcare organizations designed to assess and manage risk and identify actionable opportunities for improved patient outcomes, coordination, and cost-savings.

SOLUTION COMPONENTS

- Manual Testing
- Functional Testing
- Integration Testing
- Regression Testing
- Acceptance Testing
