# 30% Higher Deal Closures with Implementation of Automated Quote-to-Order Platform

## Insight

A leading software company's legacy online quoting and ordering platform wasn't intuitive and user-friendly. Marred by poor engagement, the frequent performance issues spelled problems during the design of product configurations.

Forsys replaced the client's quoting tool with an automated solution, which enabled them to create configurable, customized packages using product bundling and leverage automated price calculations, renewals, and approvals. Backed by our E2E planning, the new solution enabled the client to accelerate the quoting time by 32%, boost the deal size by 22%, improve deal closure by 30%, and grow sales revenue by 25%.

**Headquarters**
Ontario, Canada

## Business Challenge

The client's research and benchmarking studies found that the legacy online quoting and ordering system failed in parameters such as:

- Ease of use
- Intuitiveness
- Scalability
- Integration
- Uninterrupted access

## Transformation Journey

Forsys retired the client's in-house quoting tool and implemented Conga CPQ, which modernized their online Quote-to-Order system, executed product bundling, automated price calculations, renewals and approvals, and streamlined the user experience.

The key highlights of the implementation:

- Execution of out-of-box asset-based ordering for renewals.
- Integration of Conga CPQ with SURF platform.
- Configuration of subscription-based products in-built with business, inclusion, and exclusion rules.
- Implementation of multi-level approval requests.
- Bundle cloning & removal of manual reprocessing of renewals and amendments.
- Implementation of amendment and renewal quotes using the original contract.
- Automation of calculation and addition of VAT based on billing address, and discounting.

## Impact

- **Improvement in quoting time by 32%**
- **Growth in deal size by 22%**
- **Jump in deal closures by 30%**
- **Increase in sales revenue by 25%**
- **Reduction in process automation workflow rules**
- **Execution of language-specific quotations**
- **Lesser hours spent on new product configuration**
- **Fewer quote templates**
- **Better TAT for quotation generation**

## About the Client

The client offers cloud-based platforms and solutions to help digitize and unify organizations so that they can find smarter, faster, and better ways to make a workflow. It empowers employees and customers to be more connected, more innovative, and more agile.
