FORSYS
Forward Thinking

50% ROI Improvement with Modernization of Brand & User Experience Resulting in Diversified Revenue Streams

CASE STUDY

INSIGHT

A leading US-based company was looking to expand their reach by revamping their brand from scratch, their pitch, and their website.

For the client, Forsys designed their brand experience, built their website, created differentiated pitches for two different audience segments, and consolidated them in a master deck format, which enabled them to achieve 50% ROI jump.

BUSINESS CHALLENGE

The client needed digital transformation assistance to display its role as a true market leader, empowering and mentoring startups through its brand values by building a sophisticated web platform.

TRANSFORMATION JOURNEY

Forsys designed the brand experience for the client. We organized a mission-vision workshop to define and understand how the client wants to be perceived by its users, and create pitches for two different audience segments.

To enhance the client's brand experience, we leveraged a three-pronged approach to solution:

Creation of an online presence with a website.

Consolidation of the entire pitch in a master deck format.

Information segregation to cater to the needs of specific audience segments.

IMPACT

50% improvement in ROI.

Identification of new revenue streams.

Improvement year-on-year growth rate after branding.

ABOUT THE CLIENT

The client is a community, founded by a team of nine successful entrepreneurs and industry leaders, that powers new-fangled ideas, new-generation products, and futuristic business models to nurture a culture of innovation. Since its inception, the company has done its best to provide every zealous startup with a community to grow in by surrounding them with established leaders, mentors, investors, service providers, and customers.

SOLUTION COMPONENTS

User Research, Usability Research, Hotspot Analysis, HTML5, CSS3, Bootstrap, jQuery, Viewport Meta, Slick.
