30% Faster Contracting with Optimization of Contract Lifecycle Management for a Mobile Games Company

Insight

An award-winning American developer and publisher of video games for mobile phones and tablet computers faced difficulties managing massive volumes of legal contracts stored across multiple repositories due to the diverse & extensive nature of the contracting structures.

Forsys teamed up with Conga, designed a customized solution that enabled the client to streamline the contracting process end-to-end. As a result, the contracting time improved by 30%.

Industry	Revenue	Employees	Headquarters
Computer Games	500+ M	800+	California, US

Business Challenge

In the last 15 years, the client leveraged different solutions to manage the contracts. It used shared network drives, spreadsheets, and SharePoint as contract repositories, which lacked the capabilities to centralize and streamline the contracts.

Listed below were the critical requirements of the client:

- **Optimization of the complete contracting structure, from contract initiation to signature.**
- **Low-maintenance structure and adaptable feature enhancements**
- **Insight into reports and visibility of dashboards.**
- **Track legal contracts.**
- **Creation of a scalable and reliable contract repository.**
- **Performance tracking of contracts.**

Transformation Journey

Forsys engaged with the client's legal team, drafted a customized, detailed plan based on the current structure of legacy contracts, and implemented Conga CLM solution.

The key highlights of approach to solution:

- **Identified business drivers for Conga CLM deployment.**
- **Recognized must-haves, key functions, and features.**
- **Proposed Salesforce CRM implementation to get a single source of truth for data.**
- **Analyzed software to meet customer requirements.**
- **Configured the system to meet the function and process requirements.**
- **Trained users & laid the CLM foundation for future enhancement.**
- **Extracted key information from the legacy contracts and seamlessly migrated it to the Conga repository.**

Impact

After Conga CLM implementation, the client witnessed the following:

- Standardized workflows and streamlined operations.
- Enhanced user productivity and identified risks with better insight into contract processes.
- Reduced contracting time by 30% and improved the user experience.
- Boosted contractual, regulatory, and corporate compliance.

About the Client

The client is a San Francisco-based leading developer and publisher of mobile games with a history spanning over a decade. Founded in 2001, the company has its culture rooted in taking smart risks and fostering creativity to deliver world-class interactive experiences for mobile game players. The customer boasts a diverse portfolio comprising top-grossing and award-winning original and licensed IP titles available worldwide in the App Store and Google Play Store.
