Case Study

FORSYS
Forward Thinking

Quoting Solution Integration, Elimination of Manual Processes & Reduced Pricing Errors by over 30%

Insight

A leading technology company that works with FQHCs, Health Systems, and Revenue Cycle Management businesses, is managing its quoting process using excel spreadsheets. Due to the lack of standardization, the process is time-consuming and error-prone.

Forsys deployed the solution that enabled the client to automate its quoting process and lower the time spent on quote generation by 25%, reduce the pricing errors by +30%, shorten the sales cycles and time to market, increase conversions, improve the forecast accuracy, and increase the up-sell and cross-sell opportunities.

Industry	Revenue	Employees	Headquarters
Software Development	<$5 Million	25+	California, US

Business Challenge

After implementing Salesforce to manage its opportunity pipeline, the client realized that a key part of its vision remained missing and unfulfilled.

The limitless possibilities of combinations made the quoting process highly involved and the chances of errors high. The client needed a quoting solution that could be scaled and integrated with their operations.

Here are some of the challenges the client encountered:

- Using emails and excel spreadsheets for quoting
- Configuring products based on business requirements
- Time-consuming discount-based approvals
- No auto recommendation for products
- Unable to distinguish between renewal and upsell opportunities
- Manually-driven region-based security model
- Migrating existing quotes to the quoting tool

Transformation Journey

Forsys offered strategic advisory services, staffed the project team, comprising Business Analysts, Solutions Architects, and a Project Manager, and implemented Salesforce CPQ.

Here are the key highlights of our solution approach:

- Configured product bundles in Salesforce CPQ.
- Revised product rules and constraints to improve pricing accuracy.
- Cloned bundles, eliminating the need to reprocess renewals and amendments manually
- Created quotes for contract amendments and renewals based on the original contract
- Enabled multi-level approval requests through dynamic advanced approvals
- Reduced the number of quote documents and addendums.
- Enabled discounts on the quote and line items.

Impact

Since the go-live, the client has witnessed a series of benefits comprising:

- **Over 30% reduction in pricing errors**
- **Over 25% less time to generate quotes.**
- **Forecast accuracy increased by over 21%.**
- **Upselling rose by nearly 29%.**
- **Invoice discrepancies fell by over 10%.**

About the Client

The client helps RCMs and health systems better manage uninsured populations. It works closely with FQHCs, Health Systems, and Revenue Cycle Management organizations across the nation to simplify the Enrollment Cycle. The California-based company makes health coverage accessible and manageable for 75M publicly covered patients in the US.
