Case Study

Learn how Forsys helped a global software major to optimize and streamline its shipping process by transitioning to Oracle SOA Suite

About The Client

Founded in 1999, the San Jose-based client is a leading global provider of the cloud and software platforms, systems, and services required to deliver the unified access network and smart premises of tomorrow. Our client's platforms and services help customers build next-generation networks by embracing a DevOps operating model and optimizing the subscriber experience by leveraging big data analytics. Communications service providers rely on this conglomerate to help them master and monetize the complex infrastructure between their subscribers and the cloud.

The Background

As more and more businesses are realizing the need to keep up with the digital transformation initiatives, our client was no different. With the client aiming to accelerate digital evolution, it came to realize that the manual tracking of the shipping process and the inability to capture complete information impacted the processing of orders.

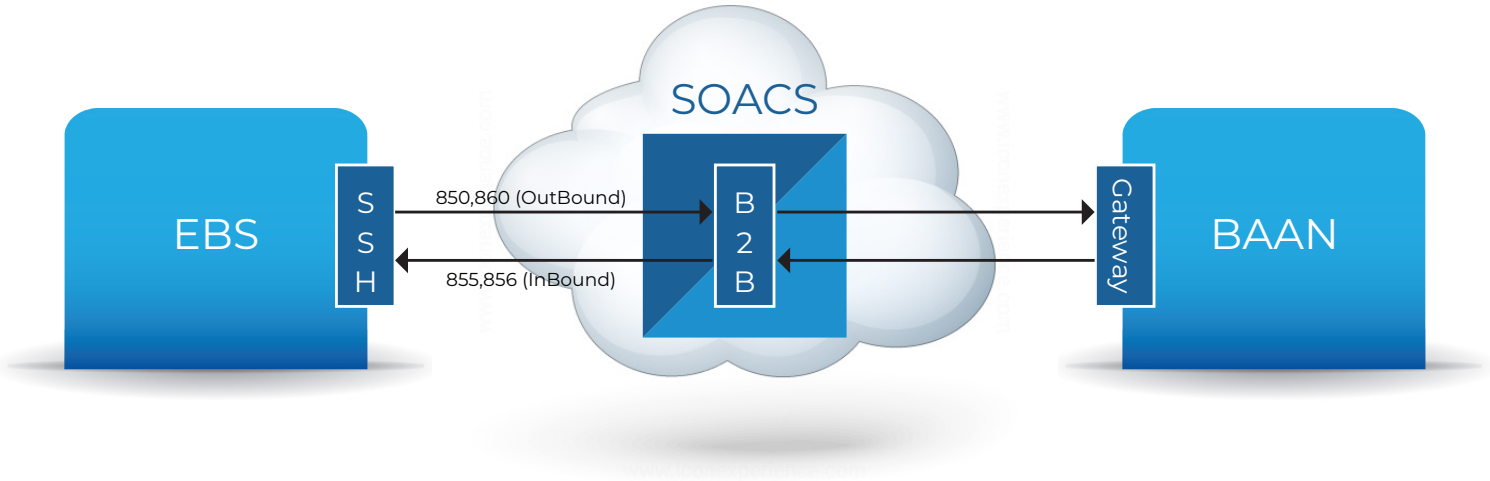
The Challenges

The below-mentioned challenges impacted the client's revenue, growth forecast and business expansion plans.

- Used manual processes to communicate with the contract manufacturer.
- Unstreamlined shipping process resulted in user-prone errors.

The Solution

The client came to realize that to achieve operational efficiency, it needed a vendor capable of supporting seamless automation and integration competencies. After Forsys came on board as the vendor of choice, it offered the following to the client.



- Automated the shipping process from contract manufacturer to client in EDI x12 format.
- Seamless Integration between EBS e-Commerce Gateway and Supplier Baan system.

Benefits & Results

The customer was impressed with Forsys' agile approach as it empowered them to achieve the following:

- Streamlined the complete end-to-end business processes.
- Enhanced efficiency and scalability of the cabinet orders by 75%.
- Automated upgrades helped to curtail support costs by 50-60%.
- On-time shipping and invoicing.
- Reduced manual errors by 80%.
