Salesforce CRM implementation for A Private University

Client Background

This international, private, not-for-profit university, prepares students for professional careers of service and leadership. It promotes the discovery and application of knowledge to improve the lives of people in diverse communities around the world.

Problem

University lacked visibility into the admission processed across various locations which also hampered the implementation of internal processes. It required a CRM Solution to integrate with its existing ERP system with marketing, inquiries and enrollments.

Solution

- Forsys implemented Salesforce CRM to automate lead management
- Provided integration with ERP and College Net systems to reduce organizational silos
- Deployed enterprise edition for 40+ users empowering seamless operations
- Set up a solution to unify and manage inquiries from vendors, direct email and website in Salesforce.com

Benefits

- Provided greater visibility into inquiries and better delivery of marketing campaigns
- Multiple touch points across the sales cycle extended outreach and connect with customers
- Effective utilization of marketing and ROI measurement across eleven campuses
- Dashboard helped drive customer success and provided transparency across all levels
- Real-time reporting in dashboard helped data analytics and customized forecasting
- Availability of single interface for all data management and reporting
- Provided a scope for a timely notifications to users on achieving milestones
