Insight

A leading tech manufacturer wanted to build a digital commerce platform that would allow customers and partners to manage their lead-to-revenue (L2R) transactions. Additionally, they wished to revamp the website to harmonize the experience for internal and external users, as well as integrate with Salesforce.

Forsys revamped the client's digital commerce website, integrated it with Salesforce, and provided customers with various options for customizing their purchases. As a result, Forsys combined 250+ user stories into a single web-based interface, integrated 8 distinct user flows to streamline the quote-to-cash process, etc.

Business Challenge

The client wanted the website architecture to comply with the user stories that were obtained from internal research, thus necessitating a revamp.

Here are the key challenges the client faced:

- **Confusing multi-step navigation**
- **Design inconsistencies and non-uniformity across pages**
- **Time-consuming order tracking**
- **Different user flows for internal sales users, partner sales users, and external end-user customers**
- **Difficulties in viewing products, communicating with sales reps, and customizing & tracking orders**
- **Lack of effective exposure to relevant information**

Transformation Journey

Forsys, as the UX partner for the client, enhanced their digital commerce website and integrated it with Salesforce in the backend.

The core components of the transformation journey:

- **Redesigning user journeys to improve accessibility.**
- **Streamlining the management of repeat and long-time orders.**
- **Upgradation of functionality to simplify order creation.**
- **Enhancing usability for specific product types for sales reps.**
- **Seamless user flow integration in the UI.**

Impact

- Unification of varied user stories into a cohesive web-based experience resulted in optimization of L2R transactions
- Assimilation of 8 distinct user flows for a seamless quote-to-cash experience
- Redesigning 20+ pages with the integration of 12+ status labels into user flows
- Streamlining the entire website for seamless navigation as per the brand guidelines
- Creating a visual system to ease classification and differentiation on highly detailed and content-rich pages
- Enhancing access to products from a location of choice
- Decrease in overall complexity for easier adoption

About the Client

The client is a global technology leader advancing a sustainable energy future for all. They serve customers in the utility, industry, and infrastructure sectors with innovative solutions and services across the value chain.

Solution Components

Accessibility & Usability testing, A/B testing, Iterative Design, Rapid Prototyping, Solution testing, Figma, Photoshop, Illustrator
