Modernize Your Sales Processes to shorten Deal Cycles & Improve Pricing Compliance with Salesforce Revenue Cloud Advanced

Are you facing issues with a fragmented sales process? Leads and opportunities are being tracked in Salesforce but key functions such as quote creation and contract management being executed manually? This disconnected approach can lead to delays, repeated data entry, inaccurate records, and restricted visibility into deal progression.

Forsys addresses these inefficiencies by streamlining your complete quote-to-cash lifecycle with a seamless implementation of Salesforce Revenue Cloud Advanced (RCA). Furthermore by achieving integration of Document Collaboration and Digital Signature platforms our solution offers end-to-end automation, improved compliance, and measurable speed-to-close benefits.

Business Challenges

- Fragmented quote-to-cash processes.
- Manually created quotes stored in spreadsheets.
- Absence of real-time quote-opportunity sync
- Reduced governance and process efficiency due to lack of automated workflows for pricing approvals, no product validation checks, and lack of document collaboration tools
- Inconsistent Data from documents being uploaded without leveraging automation
- Insufficient visibility into deal stages and document lifecycle

FORSYS' APPROACH

Forsys initiates your transformation journey with a discovery phase to find the gaps and redesign the quote-to-cash process. The goal is focused on replacing fragmented manual steps with a unified, digital framework to ensure end-to-end visibility, stricter governance and enhanced operational efficiency across sales and contract workflows.

Here are highlights of what your transformation journey will entail:

Enable End-to-End Revenue Lifecycle Management

We help you evolve from siloed, traditional quoting and pricing methods to a connected, full-spectrum revenue lifecycle strategy. Manage subscriptions, contracts, billing, and revenue recognition seamlessly—all within a unified platform that brings together sales, legal, finance, and operations.

Unify Cross-Functional Workflows

We bridge gaps between sales, legal, finance, and operations, enabling synchronized workflows that improve efficiency, reduce delays, and support faster decision-making across your revenue processes.

Analyze & Map Your Existing Setup with RCA Adoption Tool

Our RCA Adoption Tool integrates directly with your existing instance to give you a detailed mapping of your existing landscape—products, bundles, pricing rules, and configuration flows—while preserving current relationships and dependencies.

Automate Discovery of Revenue-Critical Data

The tool intelligently pulls in essential product, pricing, and transactional data, offering you a comprehensive and accurate foundation for planning your Revenue Cloud adoption and transformation.

What You Achieve

- Faster quote turnaround
- Improved pricing and approval compliance
- Full visibility across accounts, opportunities, and contracts
- Reduced Manual Effort Through Automation
- Scalable Foundation for future product growth and expansion
