Insight

A global technology leader offering Global Navigation Satellite System (GNSS) products used direct, indirect & self-service channels to sell the positioning products. It wanted to scale its global omnichannel selling strategies because the self-service channel supported only a few use cases.

Forsys implemented a Digital Commerce solution on the Salesforce platform, which improved internal and external collaboration; enhanced tracking; and reduced the Quote-to-Cash-related operating expenses. This resulted in 18% improvement in customer retention and 23% jump in customer lifecycle value.

Business Challenge

While the client set out to optimize the selling and buying experiences, Forsys implemented Conga Digital Commerce that allowed multiple use cases for new sales and upgrades, and offered support on the Salesforce platform with Conga CPQ.

Transformation Journey

While the client set out to make its selling and buying experience more optimal, Forsys implemented Conga Digital Commerce that allowed multiple use cases for new sales and upgrades, and offered support on the Salesforce platform with Conga CPQ.

The key highlights of the implementation journey:

- Deployed Conga Digital Commerce solution on the Salesforce platform with Conga CPQ APIs/ Angular UI to support customers and dealers.
- Leveraged quotes/orders collaboration between the internal sales and customers/dealers to enhance tracking.
- Supported ongoing enhancements and maintenance activities in a managed services model.

Impact

After the project went live, the client:

Improved customer retention by 18%

Enhanced customer lifecycle value by 23%

Grew upsell and cross sell opportunities by 30%

Reduced Quote-to-Cash-related operating expenses

Curtailed time-to-quote

Unified buying and selling experience

Shortened sales cycles and increased conversion

About the Client

The client is a global technology leader, pioneering end-to-end solutions for assured autonomy and positioning on land, sea, and air, which are critical to precision agriculture, defense, transportation, marine, survey, and many other industry applications. Their technologies focus on GNSS and INS (Inertial Navigation Systems), including global corrections services, anti-jamming, anti-spoofing, as well as advanced algorithms for specialized applications.

Solution Components

Conga CPQ, Conga Digital Commerce, Salesforce, JIRA
