Oracle ERP Cloud Patch Testing

An End-to-End Automation Solution Ensure faster, reliable, and cost-effective testing for Oracle ERP Cloud Applications

Oracle ERP Cloud Auto-Upgrade involves much more than merely applying the application or database-level patches and can be challenging and disruptive to businesses if not planned. How to manage this in a short notice of about 2 weeks? How to minimize the spike of support tickets? Answer is Automation. Implement automated testing with minimal effort and maximum accuracy together with accelerated results, lower costs, and broader coverage.

Quarterly Cloud Application releases by Oracle require upgrading and regression testing at least 4 times/year. For the customers to gain the complete benefit, the pre-upgrade assessment, hassle free upgrade and the post-upgrade development must be in place.

Key Challenges

- Security
- Integration
- Performance
- Time effective
- Return on Investment
- Lead to improved business processes
- Known existing Oracle defects
- Impact on Existing functionality, report

Why we are different?

- Minimize PROD defects with our Patch Testing Strategy by 90-95%
- Achieve 100% accuracy through Intelligent automation solutions
- Reduce testing cycle time by upto 40% and gain Speed to market
- Reduce costs using Selenium Open Source Tool
- Maintain a stable Production System with Forsys automation solution

Automatic + Manual

Forsys Oracle ERP Cloud Patch Testing

Application

- Functional Testing
- Integration Testing
- Usability Testing
- End to End Testing
- Regression Testing

Network

- Security Testing
- Network Testing

Other

- Performance Testing
- Compatibility Testing
- System Testing
- Data Migration Testing

Key Features

- High Performance and Reusability
- Parallel Testing using Jenkins
- Supports Different languages as well as different platforms
- Supports Compatibility Testing
- Execute automated tests to avoid business risks associated during the Quarterly/Monthly patch releases with continuous testing
- Supports record & playback of scripts
- Generate reports automatically
