Managed Service Offerings

MSP Objectives

Stable and sustainable support model

Alignment of internal teams for strategic initiatives

Lower Cost of Operations

Scalability and Elasticity as per business needs

Patch Testing & Release management as a service

Transition Methodology

1 Week	3 Weeks	1 Week	1 Week
PROGRAM PLANNING/DUE DILIGENCE	**KNOWLEDGE TRANSFER**	**SHADOW**	**REVERSE SHADOW**
▪ Connectivity, link and access readiness check ▪ Current application landscape ▪ Develop Detailed KT Plan	▪ Execute KT Plan ▪ Application Overview ▪ Domain, Application, Support Processes KT ▪ Update Documentation ▪ Dry run End to end processes / Execute existing Test cases	▪ Shadow support ▪ Handling low priority issues ▪ Solution analysis for medium priority issues ▪ Detailed analysis of past incidents ▪ Update knowledge base	▪ Reverse Shadow support ▪ Handle all issues independently ▪ Refine SLAs if required ▪ Update knowledge base
Deliverables	**Deliverables**	**Deliverables**	
• Transition Plan	• KT documentation • App. Understanding document • Health Status report	• Updated Knowledge Repository • Draft Application Level SLAs • Draft Application Level Acceptance Criteria	

Transition Approach

M1 | M2 | M3 | M4 | M5 | M6 | Q3 | Q4

Transition

Stabilization

Steady State

Knowledge Acquisition & Transition

- Due Diligence, Knowledge Transfer, Shadow and Reverse Shadow
- Review Documentation – Requirements, Design, Configurations Test Cases, Code base etc..

Knowledge Reinforcement

- Work along with Implementation Partner in fixing hyper-care issues
- Fill gaps in knowledge
- Identify & work with implementation partner in filling gaps in Documents

Org. Change Management & Support Processes

- Agree on Support Processes – Ticket Triaging, KM, Metrics, Reporting – frequency, formats etc.
- Baseline Metrics, KPIs – SLA, SLA Thresholds
- Improve User Documentation - create FAQs & How-To Docs

Support Processes

- Adhere & Improve on Support Processes - Ticket Triaging, KM etc.

Metrics, KPI & SLAs

- Adhere, Report & fine tune agreed Metrics, KPIs and SLAs

Continual Improvement Initiatives

- Identify Improvement Opportunities – RCA, LTFs
- Identify Automation Opportunities
- Define & Improve User Self-Service Resolution Framework

Quarterly Patch Testing (TaaS Approach)

- Perform Quarterly Patch Testing in line with Oracle's release calendar

Neev Cloud Tools and Accelerators used during support and patch testing

- **Neev Automated Testing Tool for faster testing cycles**
- **CQUIK tool to write SQL queries that will help in support process**

- Neev Migration tool for any future rollouts or adding new BUs

Indicative SLAs

Response & Resolution Times:

Severity	Initial Response Time	Resolution Time
1-Critical	Within 30 minutes of working time on weekdays only	within 8 working hours
2-High	Within 1 hour of working time on weekdays only	within 16 working hours
3-Medium	Within 4 hours of working time on weekdays only	within 3 working days
4-Low	Within 6 hours of working time on weekdays only	within 5 working days

Severity	Description	Meaning
1-Critical	Critical Business Impact	Service disruption and loss of business functionality, affecting high number of users with no available alternative system
2-High	Significant Business Impact	Loss of business-critical system that has alternative short-term workaround or is acceptable to be without it for short period of time
3-Medium	Some Business Impact (Standard Priority)	Loss of system that although non-critical is deemed important by the business to key sites or users
4-Low	Minimal Business Impact	A trivial or low priority problem with little or no impact to system or functionality

Track Name	Percentage of Tickets			
	Critical	High	Medium	Low
All	5%	25%	40%	30%

Note: *The SLA depicted here are only indicative and will be agreed mutually between Neev Systems and GH during stabilization period.*

Indicative KPIs & Metrics

Key Measurement	Measurement Window	Calculation	KPI Target	Target Date
SLA Adherence	Monthly	No of tickets for SLA adherence / Total number of tickets logged	90% -Critical 95% - High 100% - Med & Low	1 month into the steady state
Aging of Open tickets	Monthly	No of tickets that are open on end of the month	No more than 10% of tickets in Month	1st Quarter into the steady state
Increased deployment velocity	Quarterly	Quarter on quarter increase	2x	1st Quarter into the steady state
%Reduction of number of Tickets over time (same user count, starts after 6 months)	Yearly	No of tickets Raised in previous month – No of tickets raised in Current Month / No of tickets in previous month	6 months into the steady state	6 months into the steady state
RCA & LTF	Quarterly	Percentage Increase of RCA coverage	10% QoQ starting at 50% of tickets	6 months into the steady state
Mean Time To Resolve	Quarterly	Improve Average time taken to resolve the ticket	10% Every Quarter	6 months into the steady state
Automation/RPA, Process Improvements	Yearly	Percentage identified & delivered	20%	End of Year

Note: *The KPIs depicted here are only indicative and Expectation & Minimum KPI measurements will be agreed mutually between Neev Systems and GH during stabilization period.*

Continuous Improvement (Optimization)

1	Knowledge Management	- Case and Solution repository - Knowledge Repository - Knowledge Sharing Sessions	✓ Quick Resolution of tickets ✓ Collective enhancement of team knowledge ✓ Improved productivity
2	Trend Analysis	Trend Analysis by modules, types of cases, complexity and severity	✓ Focused remedial actions in high frequency area ✓ Tuning of team skill to match the trends ✓ Tuning of teams to seasonal variations
3	Root Cause Analysis	RCA of re-occurring problems	✓ Reduction in support case load
4	Long Term Fixes	Propose a long-term fixes for frequently found problems	✓ Reduction in team size or same team handling more work ✓ Stability of system
5	Productive Improvement	- Skill Upgrade - R&D Initiatives - Reduction in TCO via all above measures	✓ About 5% improvement in productivity on annual basis

Sample Review Reports - QBR

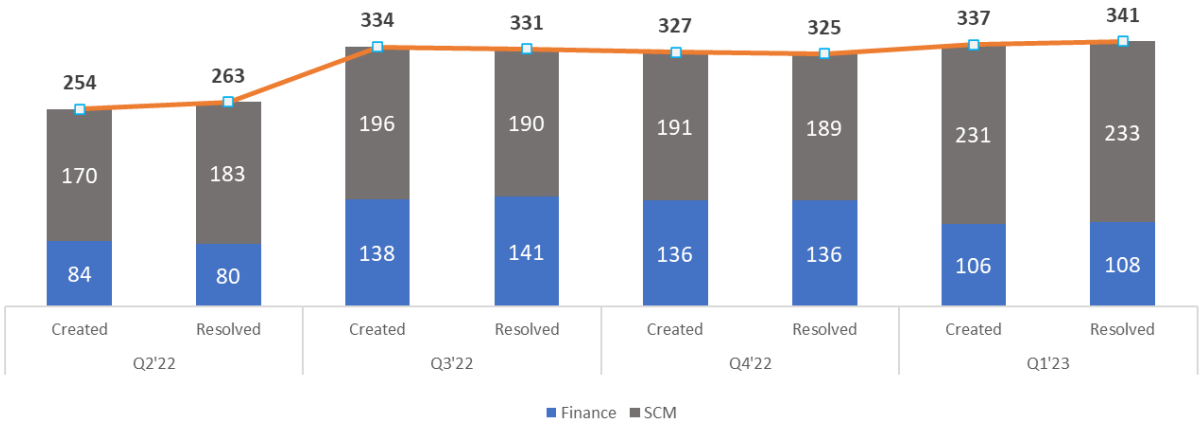
Contract Overview

Start Date: 01-Jul-2020
End Date: 30-Jun-2023

Services in Scope	Latest Update	Status
Modules Supported	▪ All modules listed in detailed SOW are supported	✓
Test Automation	▪ Tested 23A patch successfully	✓
JIRA Rollout Support	▪ JIRA is operational for US & AMEA Businesses ▪ Enhancements can be taken care by Duraflame In house Team	✓
24X5 Support Coverage	▪ Coverage is available in 24X5 mode with US & AMEA teams ▪ Shared Shift Roster for Apr-23	✓
Optimize Team Structure	▪ Changed Team structure in place ▪ Onsite Resource – Rolled out	✓
SME Advisory available on request	▪ No request on advisory services ▪ Focused on other KRAs and inputs from Duraflame	✓
Additional Service & Resource	▪ Planisware support is operational – Supporting with existing team ▪ Additional Technical & Planisware support – Ramped down	✗

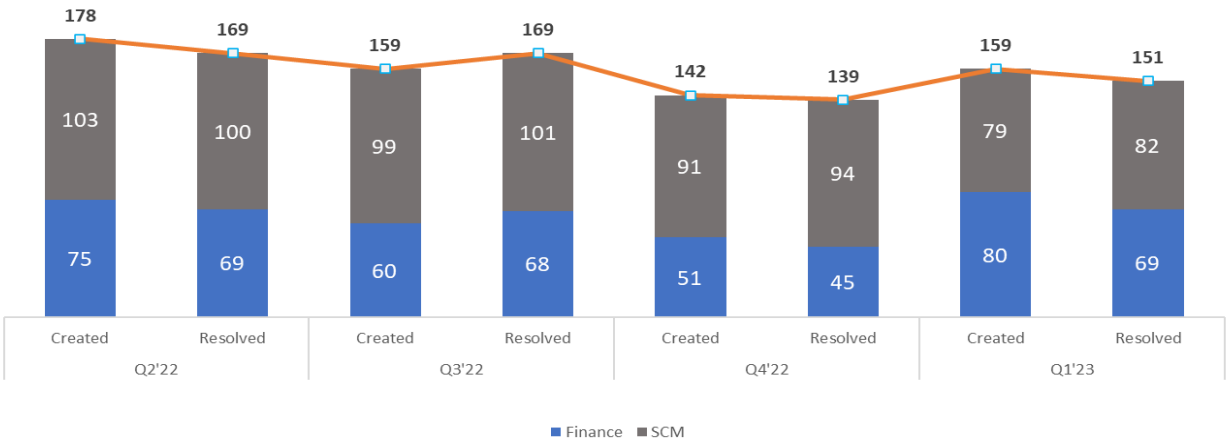
QoQ Ticket Trend (All Ticket Types)

Incidents - QoQ Created Vs Resolved



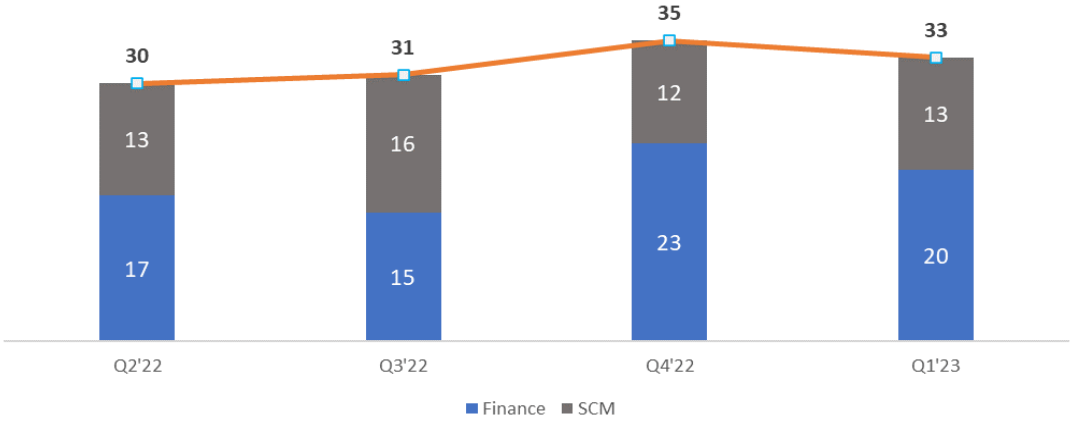
Q1 Created Vs Resolved: Jan- 148Vs136, Feb- 109Vs119 & Mar- 80Vs86

Service Requests - QoQ Created Vs Resolved



Q1 Created Vs Resolved: Jan- 74Vs65, Feb- 39Vs40 & Mar- 46Vs46

QoQ Delivered Enhancements

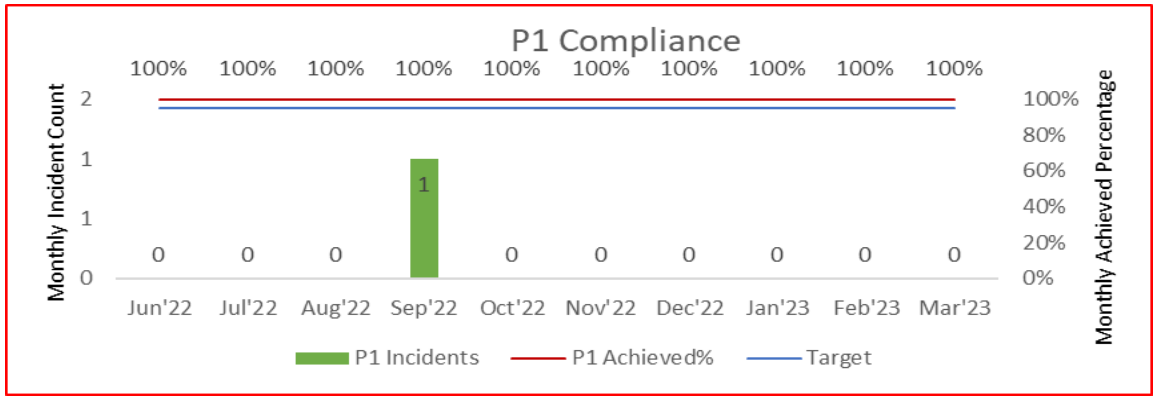


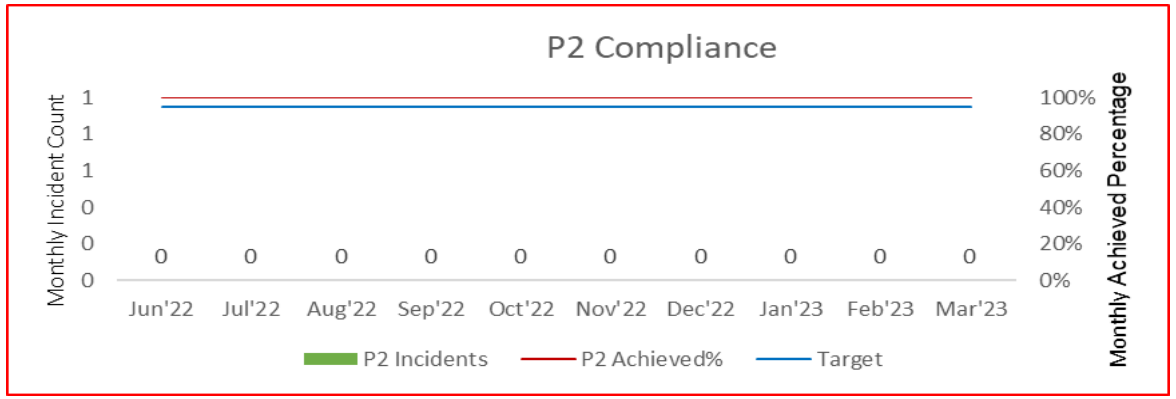
Q1 Resolved: Jan-13, Feb-10 & Mar-10

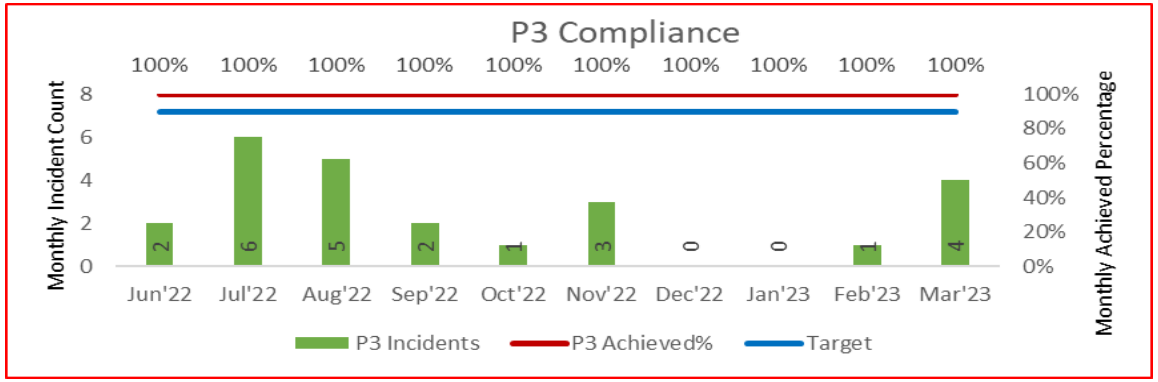
- 2023 Ticket Metrics
  - ✓ Incidents (Created Vs Resolved): 337 Vs 341
  - ✓ Service Request (Created Vs Resolved): 159 Vs 151
  - ✓ Delivered Enhancements: 33

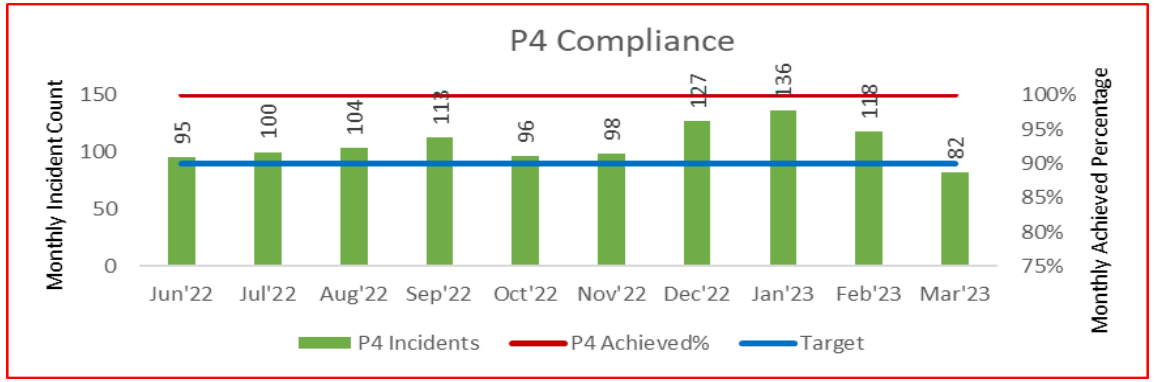
Resolution SLA Metrics

- Total Number of Incidents : 86



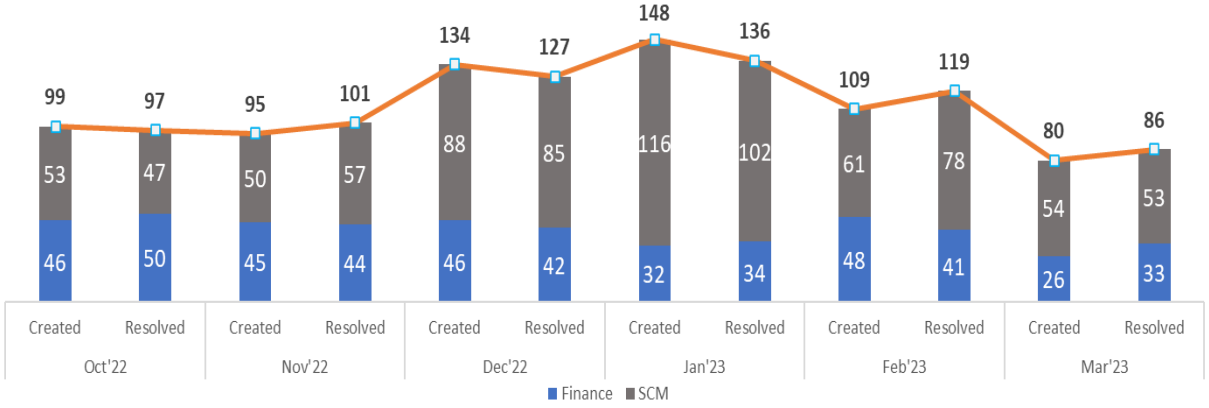




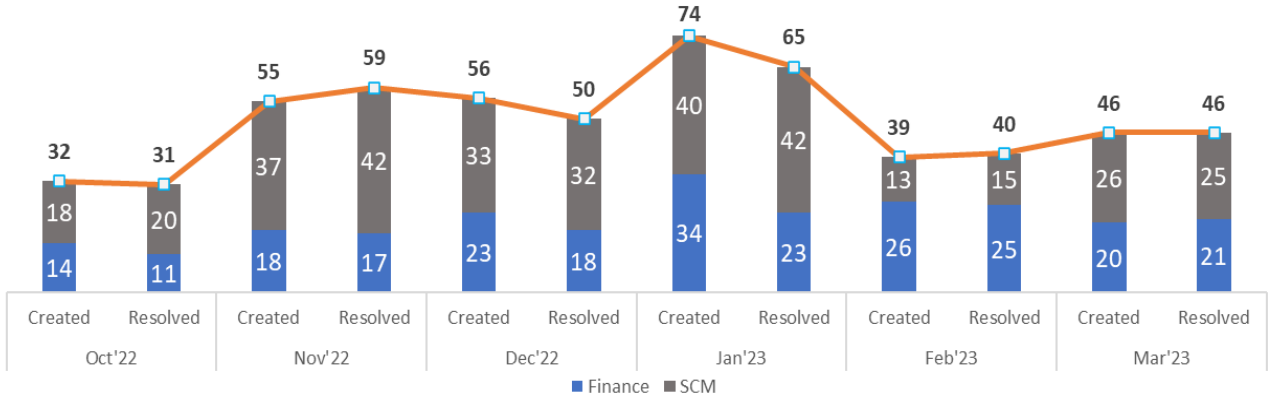


Monthly Ticket Trend Analysis (Incidents & SRs)

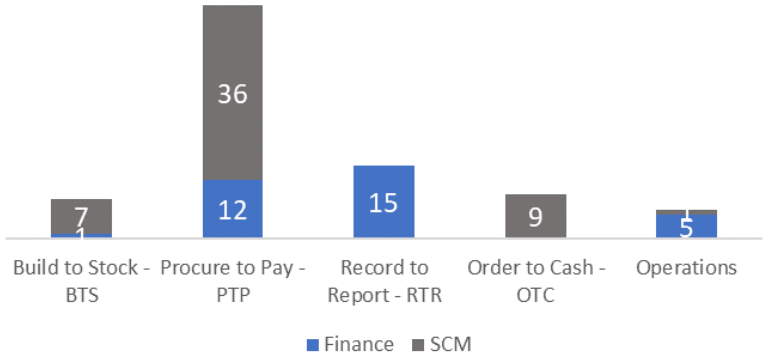
Incidents - MoM Created Vs Resolved



Service Requests - MoM Created Vs Resolved

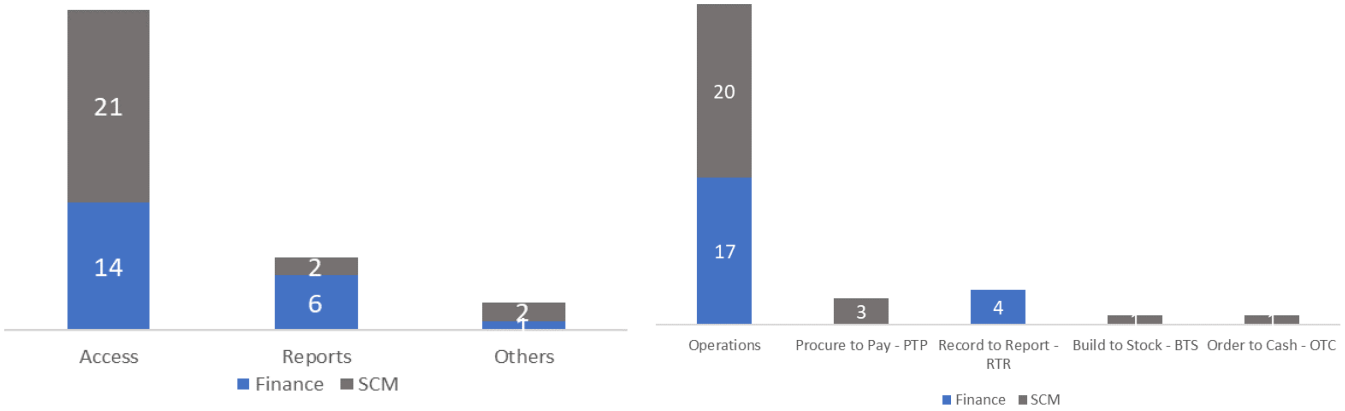


Incidents - Grouped By Business Process For Mar'23



- Observed PR/PO Approval changes, Operational and user training issues

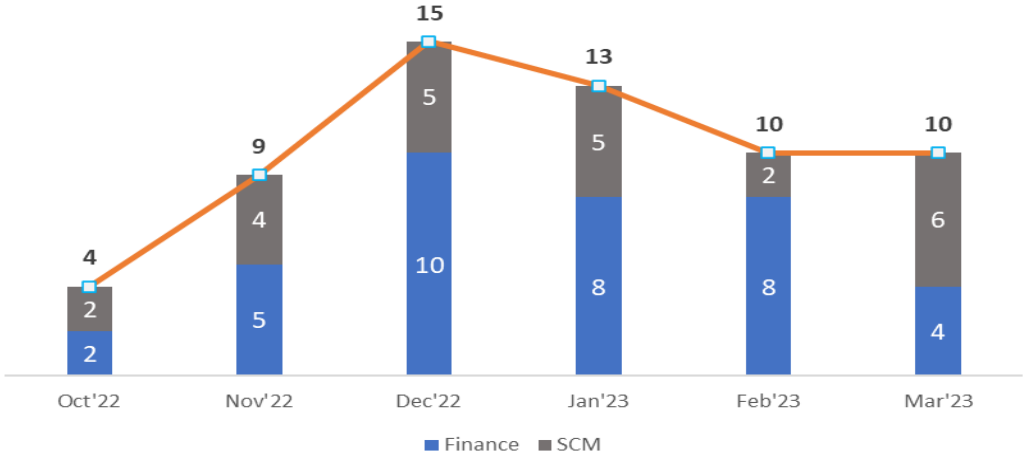
SRs - Grouped By Issue Types & Business Process For Mar'23



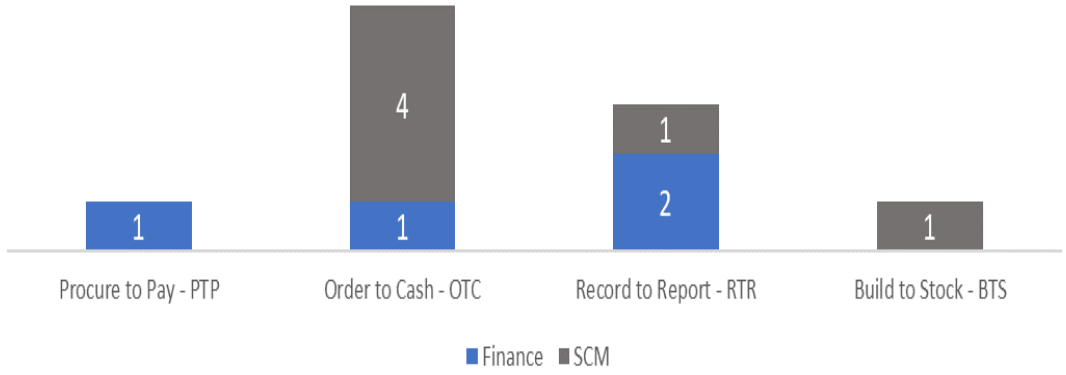
- SR Ticket count varies due to Access/Revoke requests and recurrent activities

Enhancement Overview - Mar’23

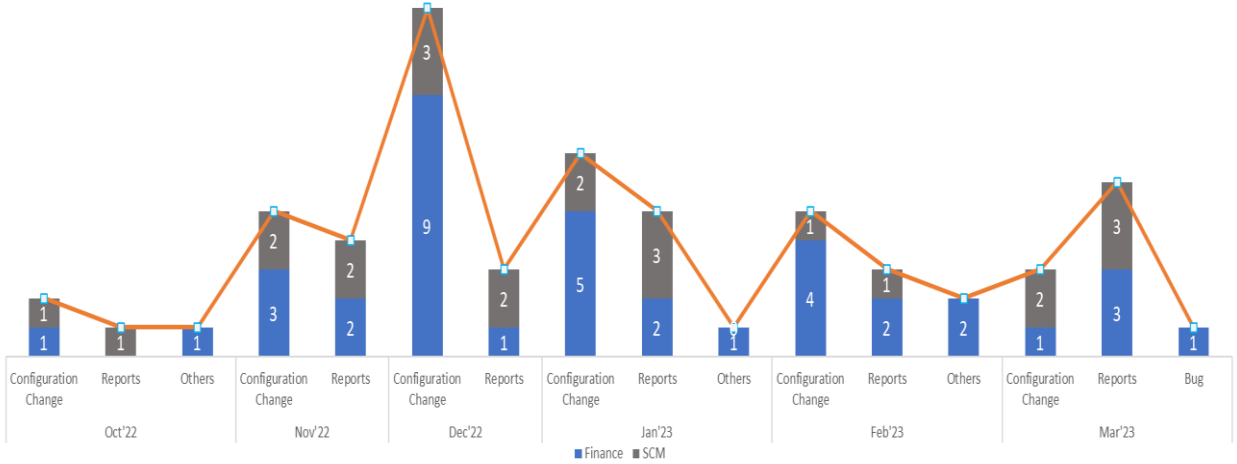
MoM Enhancements



Grouped By Business Process For Mar’23

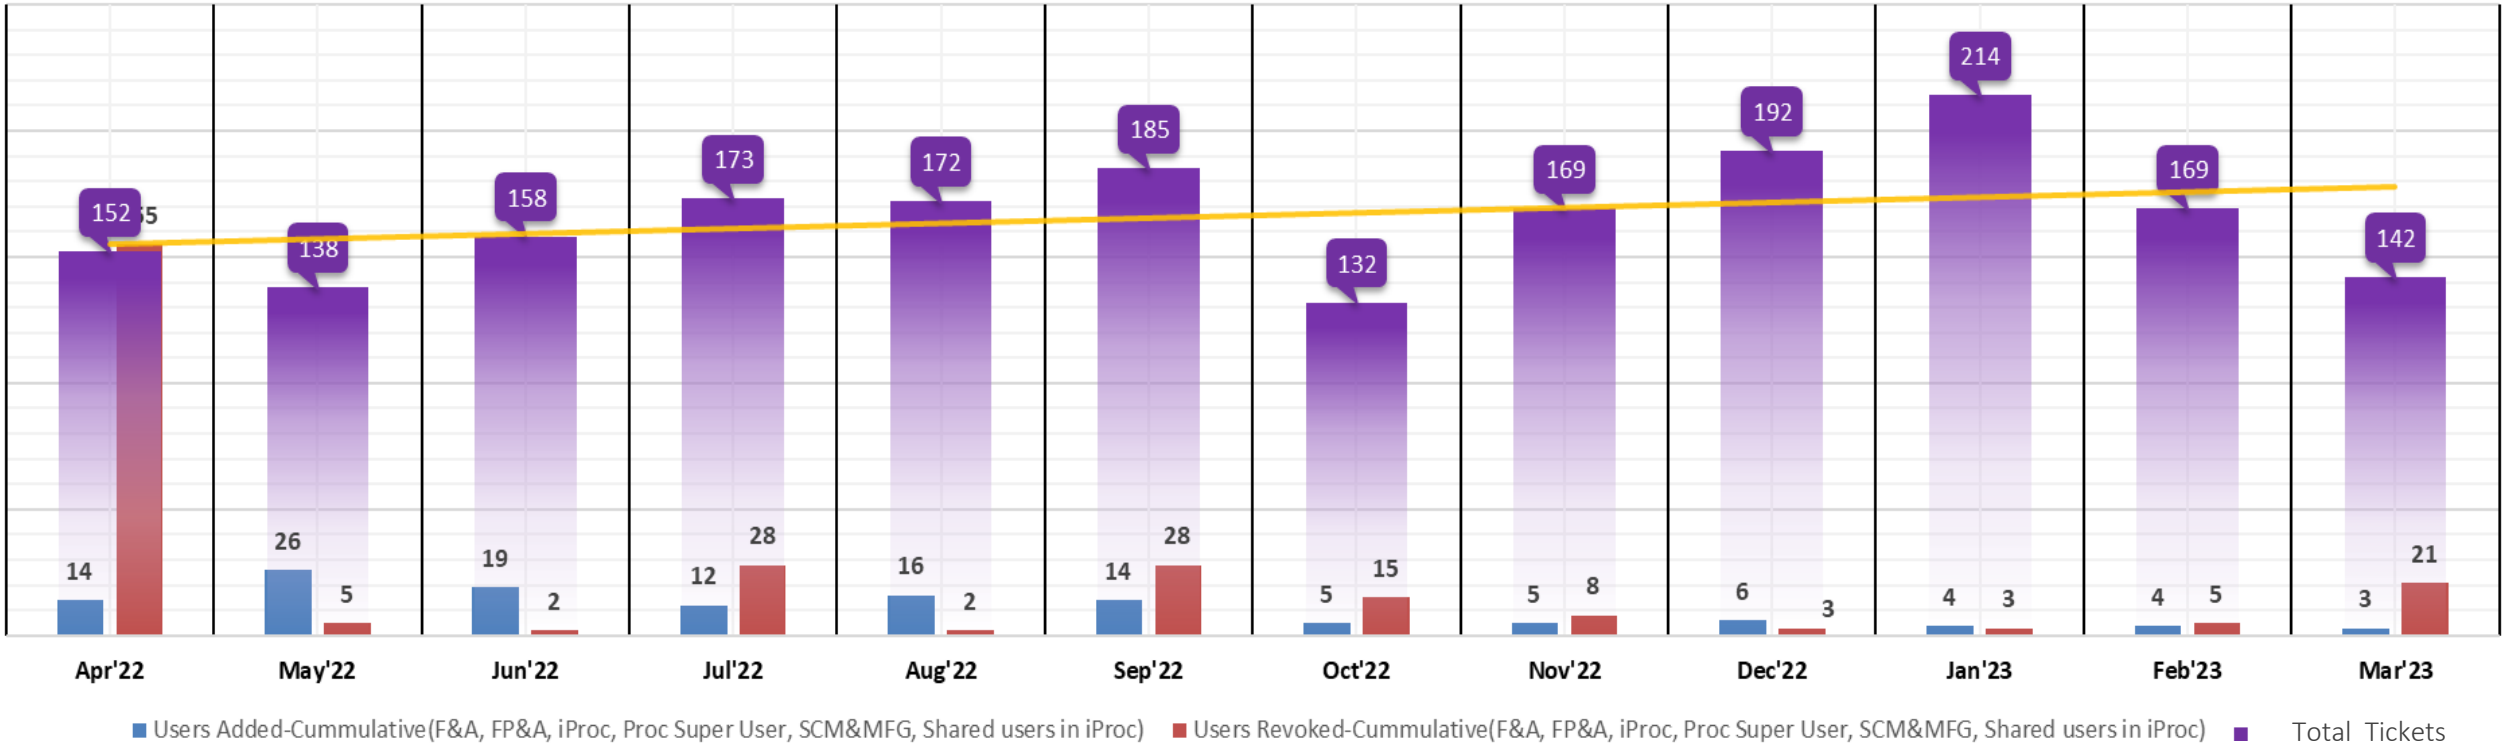


MoM Enhancement Type Segregation



- ✓ 10 Enhancements Delivered with 877 hours of effort
- ✓ 6 under SCM & 4 under Finance
- ✓ 6 Reports developed, 3 Configuration change & 1 Bug

Users Access Management 2023 (Added & Revoked) Trend Analysis



- User data cleanup activity in progress

Ongoing Improvements

Focus Area	Our Understanding	Recommendation	Progress
Lot Material Status	Material Status Quarantine setup is incorrect (Quarantine Status does not restrict material from being in pick slip, or Assembly Pull transactions)	New Material Status to be created	Prioritized for Q2
Automatic Lot Material Status update	Incorrect data appears in On-Hand reports	Need to develop Integration	Prioritized for Q2
Work Definition update from Item Structure (22C Feature)	New feature to update replacement item from Item Structure to WD	Implement the feature	Implemented
Retrieve/Update data using excel & REST API	New value addition to reduce manual work	Utilize the feature	POC done with GH IT

Core Competencies

Neev Systems part of Oracle Partner Network

Offerings in Oracle

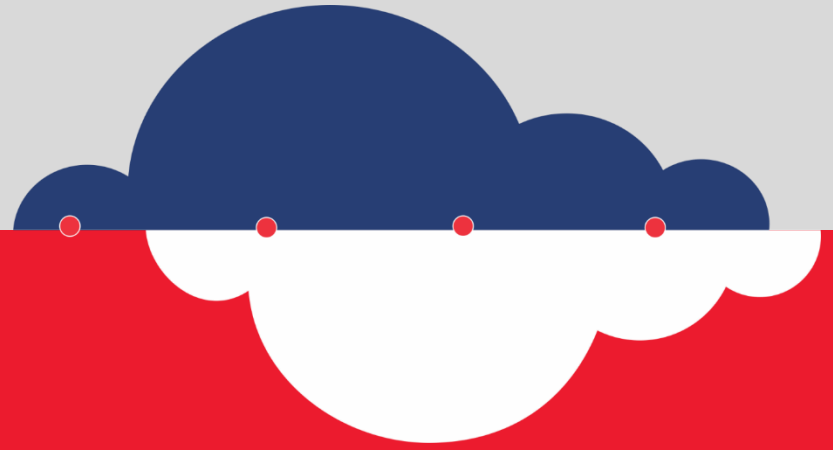
- Expertise in Oracle ERP, Customer Experience, HCM, Planning & Budgeting and BI modules
- Neev Systems offer cloud assessment, implementation rollout, migration and support

Key Clientele

Oracle Cloud Portfolio

Modules

- ERP
  - Financials
  - Supply Chain
  - Procurement
- Customer Experience
  - Marketing
  - Sales
  - Services
- Human Resource
  - HCM
  - Taleo
- Planning and Budgeting
- Business Intelligence



Services

- Oracle Cloud Assessment
- Implementation and Rollout
- Cloud Applications Coexistence / Integrations
- Migration Services
- Flexible Support Models

Oracle Cloud Service Offerings

Oracle Cloud Assessment

- Defines Oracle Cloud adoption road map for the clients
- POCs and Demonstrates expected business benefits
- Defines future system architecture

Implementation and Rollout

- End to end Fusion Application implementation services including Support
- Fixed Scope offerings Oracle Cloud Products
- Cloud Implementation methodology
- Tools are accelerators for rapid deployment (Business Processes templates. Configuration and Data Load Templates, Test Cases Etc.)
- Support Includes support for Upgrades as well as implementation features available in new releases

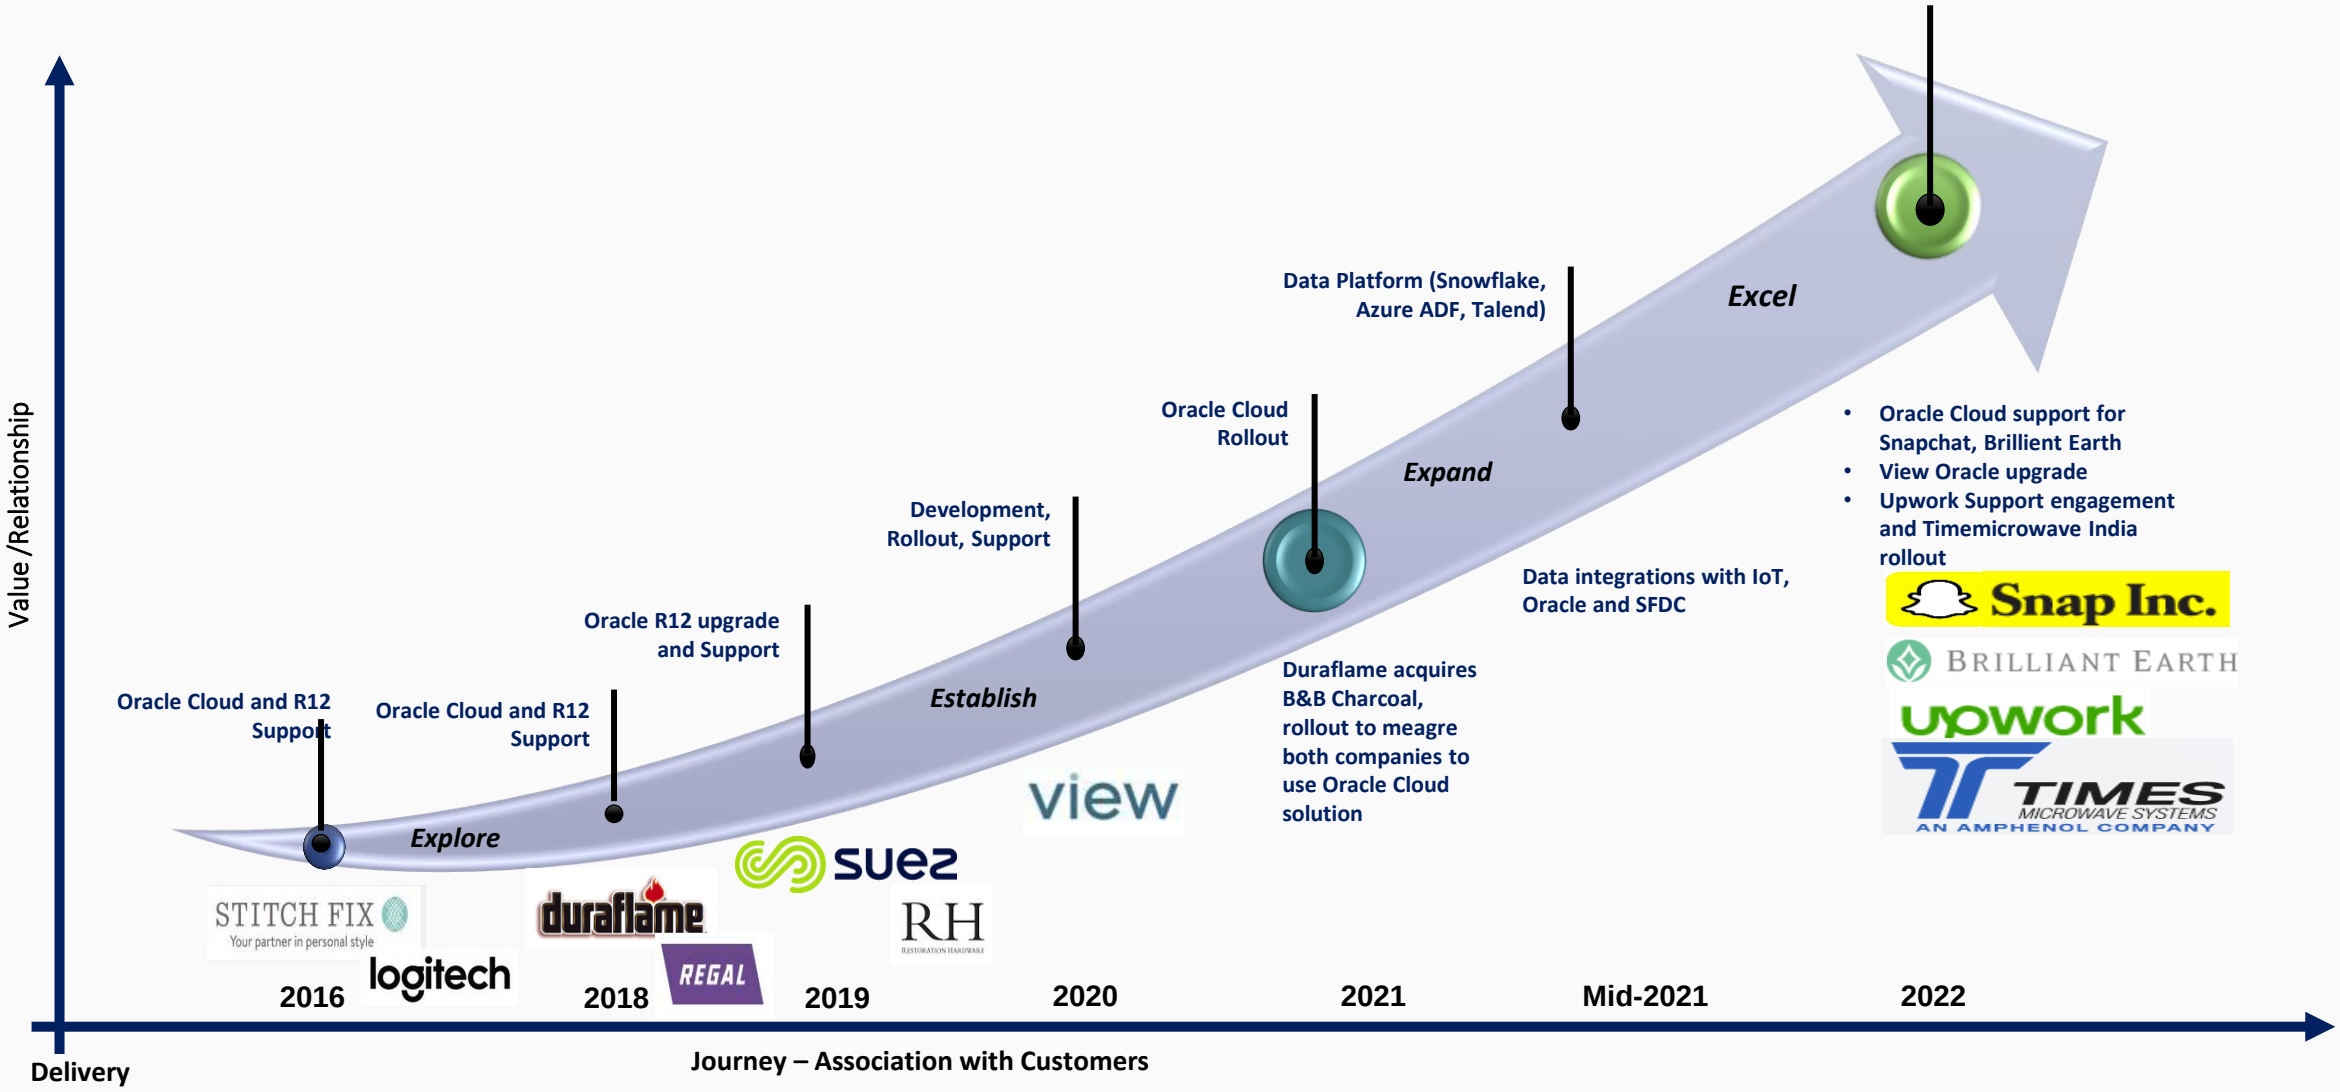
Oracle Cloud Coexistence / Integrations

- Design and develop integrations with Applications Unlimited / Legacy systems based on SOA and AIA standards
- Provides flexibility to integrate with other non Oracle systems
- Design for “SAAS/Cloud” and on premise installations

Dedicated and Shared Service Support Model

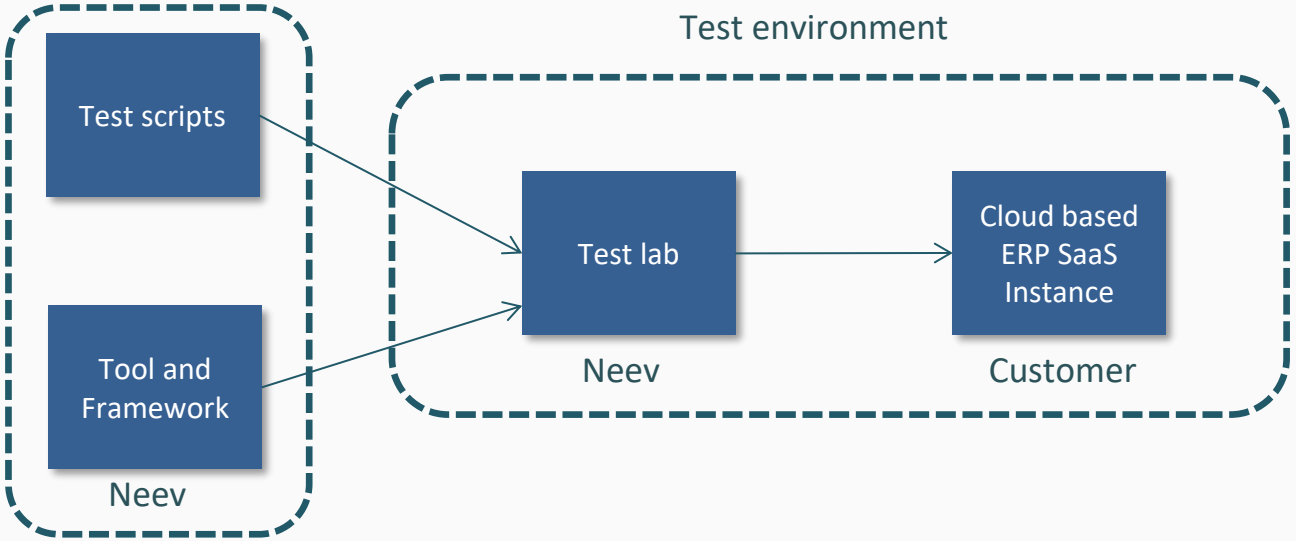
- SLA based support, Knowledge management
- Upgrade assistance including New Feature implementations

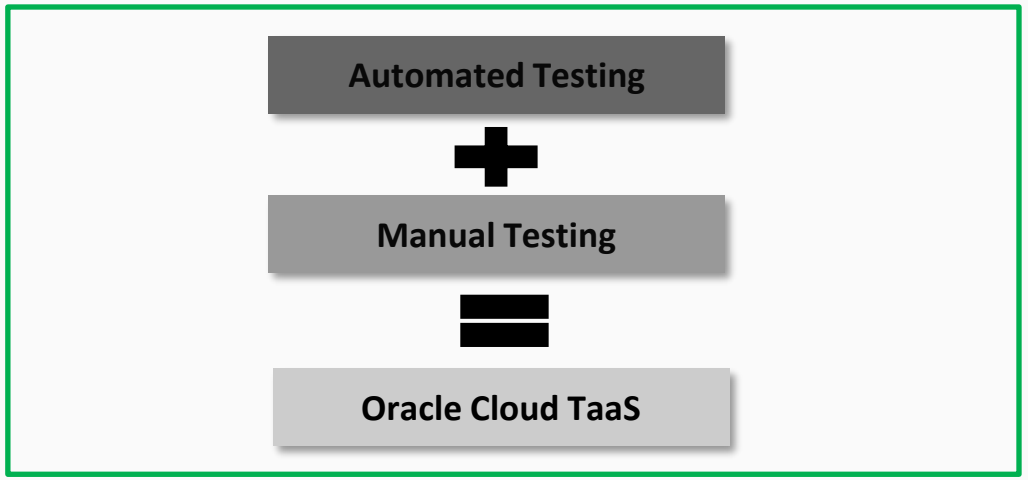
Oracle Cloud & ERP Journey



6 plus years of association - Successfully managing Oracle cloud/ERP support, development, rollouts, upgrade.

Neev TaaS for Oracle Cloud Applications





- Neev will identify the patch releases
- Coordinate with Oracle for patch release dates every quarter & track them
- Analysis of business processes that are impacted due to Oracle patch application
- Testing scope includes automated test creation / updating & test execution for identified standard flows & publish test results/ defects
- Tool & resources will be deployed by Neev
- Customer will provide access to test environments and data

- Primary testing would be automated testing (@ 60+%) for ongoing patches & upgrades (once a quarter or once in six months)
- More than 250 test scenarios are available in testing tool with 140+ in Financials, 60+ in SCM & Mfg and 50+ in HCM
- Reusable assets (Selenium tool based automated scripts) available for vanilla functionality for specific modules and will be customized based on customer application
- Neev Testing Tool will be used for standard testing

Automated Test Report

Quarterly Patch Bundle Test Scenarios - Progress Dashboard								
Test Module	**Total Tests**	**Total Pass**	**%Pass**	**Total Fail**	**%Fail**	**NA**	**Not Tested**	**% Tested**
General Ledger	22	19	86%	0	0%	0	3	14%
Receivables	26	26	100%	0	0%	0	0	0%
Payables	19	19	100%	0	0%	0	3	84%
Fixed Assets	17	17	100%	0	0%	0	0	100%
Purchasing	27	27	100%	0	0%	0	27	0%
Receiving	6	5	83%	0	0%	0	1	0%
Inventory	20	18	90%	0	0%	0	2	0%
Order Management	49	46	94%	2	4%	0	1	0%
Manufacturing	54	0	0%	0	0%	0	54	0%
Costing	17	17	100%	0	0%	0	0	0%

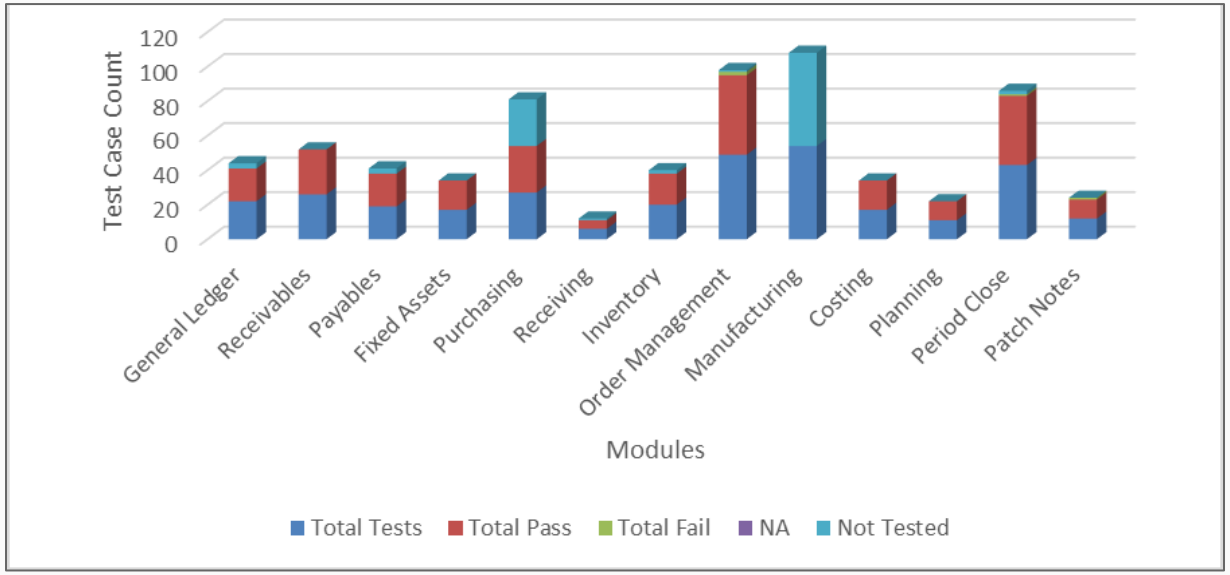
Total Functional Tests:	**323**	**256**	**79%**	**4**	**1%**	**0**	**93**	**80%**



Case Study - Duraflame

Key Benefits

- *Streamlined Business processes replacing manual processes making it more reliable and scalable*
- *Implementation of Oracle Cloud FIN, SCM, MFG, Planning, CPQ, FAW and PBCS*
- *Integrations with Custom MW Java Application, Banks and EDI Systems*
- *Automation in Path Validations*

Duraflame, Inc. manufactures fireplace products. The Company produces fire logs and starters, matches, lighters, charcoal, heaters, and electric fireplaces. Duraflame serves clients in the United States

Business Needs:

- Delivered Oracle Cloud solution to support Duraflame **accelerated** business growth by enabling key business technologies
- Streamline the financials planning and back-end accounting processes (Corporate, Property, Equity accounting)
- Improved operational efficiencies with automations in management and statutory reporting
- Development of automated solution for Integrations with external Systems
- What-If analysis and **budget integration between Oracle GL and PBCS**

Highlights:

- **Implementation and Ongoing Support of Oracle Cloud Applications – Financials, SCM, MFG, Planning, FAW, CPQ and PBCS**
- **ERP and EPM Support covering 16x5 Managed support model**
- Streamlined Business processes and replacing manual processes and controls into automated, Integrated processes
- Proactive support model for Oracle ERP, SFDC, Integrations, Agile PLM, EPM and BI
- Optimized Enterprise Design by **remolding CoA**, **Ledger , Ledger Sets for financial consolidation, period close & reporting** purposes
- Oracle OM module Integration with Custom Middleware Java Application for Sales Order Processing with required Master Data Management
- Integrations with Oracle Analytics Cloud (FAW), CQP and PBCS
- Banks Integrations for processing AP Payments, AR Lockbox and Bank Statements (BAI)
- Fully automated month end close process along with data integration and comparison between Oracle ERP and PBCS
- Automation to trigger custom Alerts against Data Sync Issues, Order Processing Failures, EDI Failures. BOL Processing etc.
- Testing As A Service (TaaS) – Selenium Automation Tool to validate Oracle Monthly and Quarterly Patches, in couple of hours TaaS Tool will generate Test Results with Individual Test Execution Reports in PDF format with all Steps and Consolidated Environment Status Report

Case Study - View

View, Inc. is an American glass-manufacturing company that produces a smart glass based on electrochromism

Key Benefits

- *Streamlined PR approval process using AME*
- *Streamlined AR Processes*
- *Integrations using Dell Boomi with SFDC*
- *Talend integrations with Ultipro, Concur*

Business Needs:

- View uses multiple systems for their business processes especially on engineering and manufacturing of make to order items and these needs integrations with oracle Applications
- Needs to streamline period close process and partial application of down payment to sales invoices
- Identify the tool for revenue recognition as per ASC 606 and implement the same

Highlights:

- **ERP, Agile PLM, Data platform, EPM, SFDC and Integrations Support covering 16x5 Managed support model**
- Proactive support model for Oracle ERP, SFDC, Integrations, Agile PLM, EPM and Data Platform
- EPM integration with Oralce ERP for ARCS, FCCS and PBCS.
- Integrations with SFDC and MES using Dell Boomi and Talend integrations with Ultipro
- BI project successfully implemented to streamline reporting using Azure ADF, Talend and Snowflake
- Initiated technical ERP upgrade from 12.1.3 to 12.2.10 – Project Go-live Oct-22
- Multiple sprints for complete end-to-end testing and release cycles

Oracle Applications Support

- Oracle Applications 12.1.3 support and enhancements with Financials, SCM, MFG modules
- Dell Boomi, Talend, SFDC & Agile support and enhancements
- Cloud Planning & Budgeting along with Financial Statements support
- Reports development using Apex

Integrations

- Real time IoT data integration and creating data lake in Snowflake for reporting and analytics
- EPM integration for creating new GL account and daily GL transactions from Oracle ERP
- Customer Master sync with SFDC
- AR Deposit Invoice from SFDC
- Sales orders and change orders integration from SFDC to Oracle Order Management
- MES integration for Work Orders
- Ultipro integration to Oracle, SFDC & Concur for HR records
- Agile PLM integrations for items

Thank you
