RFP – Oracle ERP AMS

Date: 2/5/2025

STATEMENT OF CONFIDENTIALITY and NON-DISCLOSURE

This Request for Proposal and all the information contained herein are proprietary to Onto Innovation. Onto Innovation's proprietary and confidential information shall be maintained in strict confidence by the recipient (the "Service Provider") and all employees, agents, officers or other persons directly involved in preparing a formal response to this Request for Proposal (the "RFP"). Service Provider shall not disclose any of Onto Innovation's confidential and proprietary information in this RFP to anyone other than Service Provider's employee's agents, officers or other involved persons directly involved in preparing a formal response. The use of Onto Innovation's name in any way as a potential customer is prohibited.

If you are unwilling or unable to treat this RFP and the information within as proprietary and confidential, or do not intend to respond to this request, please return this RFP to Onto Innovation immediately. If you fail to comply with these instructions, Onto Innovation will take all necessary and appropriate steps to protect its proprietary and confidential information contained herein.

Retention of this RFP constitutes your express agreement to treat this RFP and all its contents as Onto Innovation's proprietary and confidential information, and your express consent to the terms and conditions of this Statement. This applies to any/all system "integrators" with which this RFP is shared with during the response process.

Overview

PURPOSE OF THIS REQUEST FOR PROPOSAL (RFP)

We are seeking a qualified vendor to provide comprehensive support and ongoing enhancement services for our Oracle ERP environment. The selected vendor will be responsible for the ongoing support, maintenance, and optimization of our Oracle applications, including OIC, Field Service Cloud, CPQ Cloud, Sales Cloud, Demantra, and EBS as well as provide enhancement services. Key services include incident management, problem resolution, change management, performance tuning, patch management, and regular system upgrades. The vendor must demonstrate expertise in Oracle technologies, possess a proven track record of successful support and enhancement delivery, and offer a flexible support model that can adapt to our evolving business needs. Additionally, the vendor should provide proactive monitoring, detailed reporting, and continuous improvement initiatives to ensure the stability, security, and efficiency of our Oracle systems.

The chosen vendor will work as an extension of our existing IT team, acting as level 1 & 2 support For EBS Tele Services, Field Service, Order Management , Service Contracts, Finance (AR, AP, FA, Cash Management , GL) and provide level 1-3 support for Demantra, CPQ, OFSC, Sales Cloud, CX Analytics, EB-Tax, Discrete Manufacturing, Purchasing and SPP, with option of supporting level 1-3 for all modules in future.

COMPANY BACKGROUND

Onto Innovation Inc. is a prominent player in the semiconductor industry, formed in 2019 through the merger of Rudolph Technologies, Inc. and Nanometrics Incorporated. Headquartered in Wilmington, Massachusetts, the company specializes in providing advanced process control equipment and software for microelectronic manufacturing industries. Onto Innovation's product portfolio includes automated defect inspection and metrology systems, probe card test and analysis systems, and lithography step-and-repeat systems. Onto provide both hardware and software solutions to its customers as well as robust services. The company is publicly traded on the New York Stock Exchange under the ticker symbol ONTO.

Onto Innovation's commitment to innovation and customer collaboration is evident in its global presence and extensive portfolio. The company supports its customers with a worldwide sales and service organization, providing cutting-edge technologies such as unpatterned wafer quality, 3D metrology, macro defect inspection, metal interconnect composition, factory analytics, and advanced semiconductor packaging lithography. By optimizing customers' critical paths of progress, Onto Innovation helps them become smarter, faster, and more efficient, ultimately improving product quality and reliability.

Onto Innovation employs approximately 1,520 people worldwide. The company has a significant global footprint, with operations and customer support centers in key regions including the United States, Southeast Asia, China, Japan, Europe, Taiwan, and South Korea. This extensive geographic presence enables Onto Innovation to effectively serve its diverse customer base and respond swiftly to the dynamic needs of the semiconductor industry. The company's

strategic locations also facilitate close collaboration with other semiconductor manufacturers, ensuring that Onto Innovation remains at the forefront of technological advancements and industry trends.

Background

High Level Background

Onto Innovation's business currently runs on the SAP, Oracle and SysPro ERP platforms. These platforms were in place prior to the merger of Rudolph and Nanometrics. Starting in 2024, Onto Innovation embarked on an ERP transformation codenamed Project Elevate. The objective of Project Elevate is to consolidate, streamline and automate Sales, Finance, Manufacturing and Service operations under one ERP. Project Elevate is planned to go live in June of 2025.

In parallel to the Oracle ERP transformation, Onto is enabling Master Data Management and a mix of near real time and daily batch integrations through the Flow Data Platform as well as a revised Data and BI Ecosystem which is comprised of Oracle ECC, Microsoft SQL Server (On Premise) and Power BI. We are also enabling a new 3PL strategy.

Ecosystem Overview

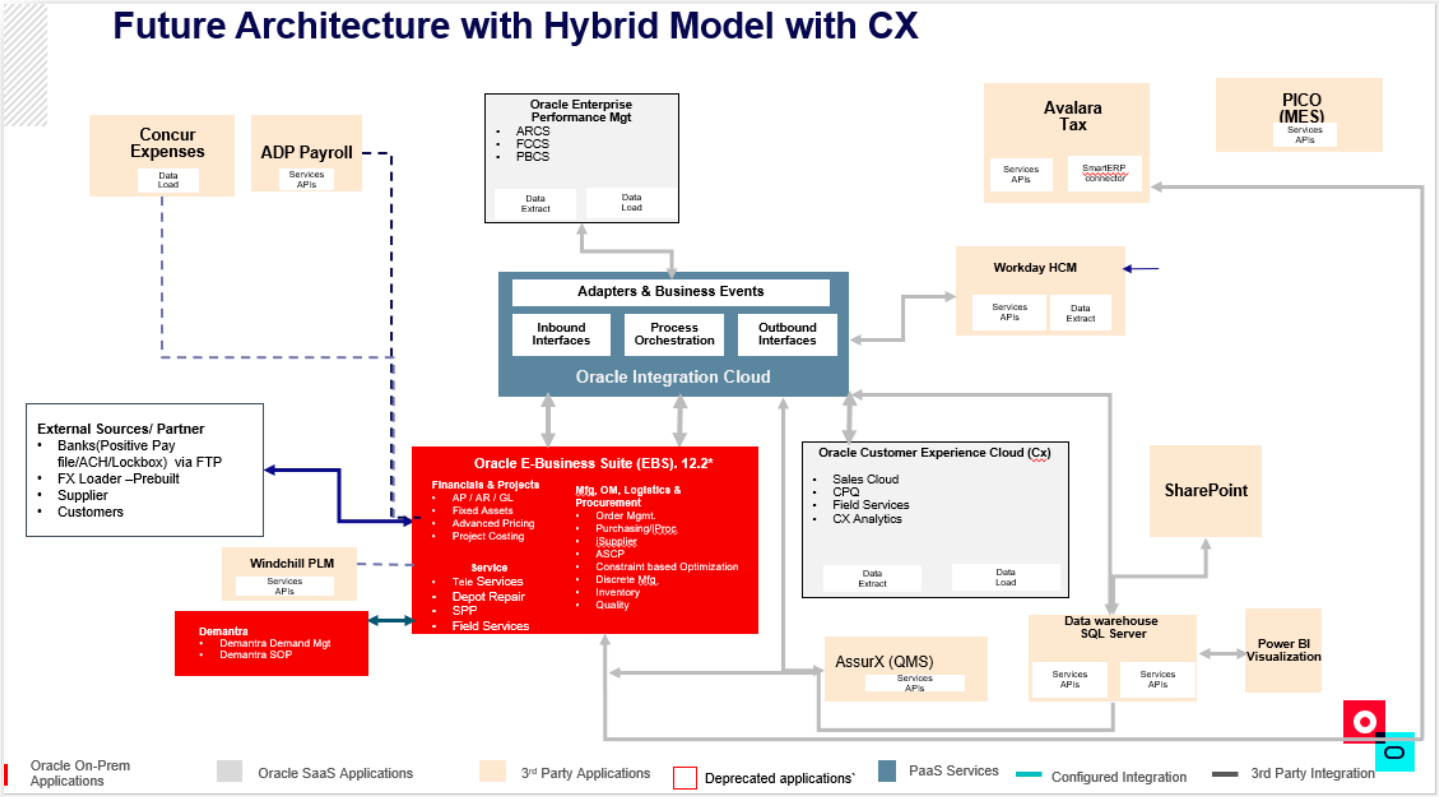
The post Elevate ERP Ecosystem will be a hybrid SaaS, on premise solutions with Oracle EBS 12.2.11 at the core along with Oracle Integration Cloud, Oracle Field Services Cloud, Oracle CPQ and Oracle Sales Cloud, Oracle Demantra, Oracle EPM as well as Pico MES and PTC Windchill PLM. For the purposes of this RFP, Pico and Windchill are out of scope.

Countries in Scope

Description	Locations
Transactional Entities	US, Korea, Japan, Singapore, China, Taiwan and the Netherlands
GL Entities	Malaysia & Vietnam (Part of Onto Singapore), Germany, France, Israel, Switzerland (Netherlands), Hongkong (China)
Manufacturing Locations	Primary in the USA: Milpitas, Bloomington, Wilmington & Tucson. Up to two more entities to process repair and refurbished tools Korea: Full tool refurbishment center
Warehousing	MFG Warehouse Milpitas, Bloomington, Wilmington, Tuscon Service – Global Distribution Center (CA), Oregon, Arizona, Europe, Singapore, Malaysia, Vietnam, Multiple locations in Korea, China, Taiwan and Japan

High Level Architecture

The following represents the high-level architecture that we will be going live with



Business Process Flow Areas

L2O – Lead to Order

- Lead/Opportunity Management in Sales Cloud, Quote Creation and Configuration in Oracle CPQ, and Order Management in EBS are implemented to support the L2O process. OIC is extensively used for real-time integration between different modules within L2O, and DocuSign is used for customer signatures.

Record to Report

- Account Receivables, Account Payables, Fixed Assets, Project Accounting, Treasury and General Ledger modules within Oracle EBS are implemented to support R2R process.

Quote to Cash

- Order Management and Account Receivable modules are implemented for Q2C flow. Both Sales and Service use these modules for billing end customers. Service Users use IR/ISO to transfer parts between US and other Regions. Service Inventory is replenished in the US and users use IR/ISOs to replenish regional warehouses. Sales Operations are based out of Bloomington and Milpitas and service users are across all regions.

Procure to Pay

- Purchasing, Inventory and Account Payables modules are implemented for P2P flow. US Manufacturing and Service predominantly uses purchasing module to source inventory parts. Service uses 3PL location to manage their inventory and manufacturing organizations uses onsite and offsite locations to manage raw materials and finished goods in US. Regions use POs to procure local parts and office supplies. # of transactions in US is 95% compared to combined regions and most of the users are based out of Bloomington, Milpitas, Tucson and Wilmington.

Plan to Manufacture (Demantra, ASCP, Inventory Optimization, Discrete Manufacturing and Spare Parts Planning)

- Demantra, ASCP, Inventory Optimization and Discrete Manufacturing modules are implemented to support Plan to Manufacture and Service Parts Planning process. Tucson Manufacturing plant uses ASCP, and other manufacturing plants use Demantra, ASCP for forecasting and planning. Service uses Spare Parts Planning, Demantra, IO and ASCP for forecasting for planning service parts across all regions. Business users are based out of the US and located across 4 US regions. Onto innovation business model is low volume, high $ with complex configuration.

Service

- Oracle Field Service cloud, EBS Tele Service, Field Service and Service Contract modules are implemented to support Service business users. There are approximately 350+ Service engineers across Europe, Asia Pacific and US region using OFSC to support FAB's across all regions. Most Service engineers are in the Asia Pacific regions. On an average 12K service requests are entered in Oracle every year

Support Scope Requirement

The scope of AMS Support includes providing 18x5 support from Monday through Friday for entities in Asia, Europe, and the US. Non-US entities require the assistance of OFSC functional, techno-functional, and OIC integration consultants to support service and 3PL users. As part of engagement, AMS team will support, monitor, fix and optimize 400+ RICEF objects and OIC integrations deployed across different modules.

We currently have an inhouse helpdesk that fields tickets through emails or entered directly in Freshdesk by requester. All Oracle tickets are passed through to L1 Oracle Support.

	Support Level	***Security and Bug Fix***	***Support Details***
CX Cloud - CPQ, Sales Cloud , OFSC and Cloud Analytics	L1-L2-L3	Y	• Technical and Functional support • End to End regression testing for Quarterly updates • Monitor and Resolve (OIC)Integration issues • Security auditing, access management
Demantra, ASCP, Inventory Optimization and SPP	L1-L2-L3	Y	• Technical and Functional support • Monitor scheduled jobs and notify respective business analysts and users if plan fails • Work with business to setup simulation plans in VCP modules in non-production instance • Business Scope for VCP includes: Demantra forecasting, ASCP for a discrete manufacturing environment, Spares Parts Planning to support a global 3PL and centralized distribution center.
EBS Service (Install Base, Debrief, etc.), Service Contracts and Depot Repair	L1-L2	Y	• Provide Technical support • Monitor and resolve OIC integration issues between Service and OFSCs • End to End regression testing for Quarterly updates • Monitor scheduled jobs and work with business analysts to resolve the errors
Order Management	L1-L2	Y	• Provide Technical support • Monitor and resolve OIC integration issues between Order Management, CPQ and Sales cloud • End to End regression testing for Quarterly updates • Monitor Intercompany IR/ISO's and resolve pending intransit and inventory issues
Purchasing, Inventory, Discrete Manufacturing,	L1-L2-L3	Y	• Provide Technical and Functional support • Provide timely support to resolve stuck transactions in Inventory • Monitor and resolve receiving and intercompany transactions • Support month end activities by resolving month end issues

			• Support users from all 4 Manufacturing facilities (Milpitas, Wilmington, Bloomington and Tucson) • Monitor and resolve Assurx (QMS) Integrations • Provide support for inventory management globally including 3rd party 3PL providers
GL, AR, AP, FA, CM and Project Costing	L1-L2 L3(EB-Tax)	Y	• Provide Technical support • Configure and Fix EB-Tax Issues • Provide timely support to resolve stuck transactions in Account Payables, Account Receivables, Costing and Fixed Assets Modules • Ensure all transactions are posted correctly • Monitor Bank integrations and work with business analysts to resolve the issues (Checks, Positive Pay, Statements and ACH • Provide technical support during month end and annual cost roll activities
OIC	L1-L2-L3	Y	• Monitor inbound and out integrations between Cloud and EBS • Support 50+ OIC Integrations • End to End regression testing for Quarterly updates

RFP Questionnaire

Section	Questions
1	**Corporate Overview**
1.1	Ownership Type (Public/Private) - Ticker Symbol if Applicable
1.2	Employee Count
1.3	Headquarters address
1.4	Year Company was Founded
1.5	What compliance frameworks are you certified in: ISO / PCI / SOC / HIPPA / HITRUST /ITIL
1.6	D&B Score
1.7	In what countries do you operate and what is the % breakdown of your geographic mix?
1.8	Are any groups outsourced/subcontracted? (support, implementation, etc.) Explain groups and Locations
1.9	How many customers do you provide Oracle AMS support for? What is the average size of these customers? What percent of your IT Application Managed Services contracts are renewed?
2.0	Describe your organization's cybersecurity program as it relates to the following: • Asset Management • Identity and Access Management • Employee, Contingent Worker & Third-Party Security background checks • 24/7 Security Operations Center (SOC) that actively monitors and responds to standard and advanced threats targeting your environment
2	**Implementation and Support**
2.1	Describe your support model for customers of the client's size? Pod, Dedicated, shared, etc.?
2.2	What ITSM platform do you use?
2.3	Do you use the clients ticketing system (we leverage FreshService)
2.4	Support Channels Supported? Chat, Phone, Portal, etc.
2.5	If we use your ticketing system, what is the process for pulling back data if we terminate the relationship?
2.6	What is your Staff retention and Replacement approach, and how will you maintain a stable core team that drives high service consistency and quality? Please include details on the Attrition rate?

2.7	Based on our scope, what is the amount of time you will need to onboard?
2.8	Please provide an onboarding plan
2.9	How do you measure success? Describe your approach towards Status reporting (e.g., dashboards, automated reporting, tools used)? What types of dashboards and reporting are most useful?
2.10	What is your process for improving support and reducing incidents over time?
2.11	How do you demonstrate commitment to meeting our changing needs and helping us reduce costs? Please provide examples of one or more situations where you came up with a solution for a client that lowered their cost.
2.12	Do you discern and assign the appropriate categorization, impact, and urgency of any new ticket?
2.13	Describe your approach to integrating and maintaining the knowledgebase.
2.14	How do you intend to manage the areas of risk for the transition?
2.15	Outline any constraints your organization foresees with the transition.
2.16	What is the process in place for stakeholder management?
2.17	What is your SLA structure?
2.18	Please provide biographies of the resources that you would assign to our account
3	**Account Management**
3.1	Outline how the account management team will ensure that requirements will be met.
3.2	What is the procedure surrounding service meetings and reporting that will be provided and the frequency at which they will be conducted?
3.3	What is the process for delivering and reporting on continual improvement efforts?
4	**Contract and Pricing**
4.1	Proposed contract duration
4.2	Termination provisions
4.3	Ramp Period & Trigger for billing
4.4	Please provide full pricing details including a matrix showing cost by resources type and/or service

5	ERP
5.1	Please detail your firm's level of expertise in how to configure each the following Oracle Cloud/EBS modules/functionality: • R2R – Account Receivables, Account Payables, Fixed Assets, Cash Management, GL • Purchasing • Inventory • Order Management • VCP – Demantra, ASCP and IO • Discrete Manufacturing • Oracle Sales Cloud • CPQ – Configure, Pricing and Quote Module on Cloud • Oracle Field Service Cloud • Service EBS – Teleservice, Field Service and Depot Repair
5.2	Indicate which of the services your firm is currently providing to customers of similar size and complexity, for the applications in this Domain: • Application break/fix • Technical configuration • Functional configuration • Performance optimization • Security and bug fix patching • End-to-end regression testing for quarterly updates • 24x7 Emergency incident response
5.3	Number of Successful EBS/Cloud Implementations in the past 5 years. Provide client names and years implemented •
5.4	What would be the staffing methodology proposed for providing Application Development Services for this domain? Please include details on: • Countries where your team is located • Operating hours by location • Global Team Structure • How do you manage time zone challenges • How will you ensure that the resources assigned to Onto Innovations will have the level of experience you have indicated in your response?
6	**OIC**

6.1	For each of the clients that your company has provided OIC integration Managed Services support within the last 3 years, please detail the following: • Number of clients • Volume of integrations supported for each client • Details on the complexity of the services
6.2	How many of your resources have participated in supporting clients with over 50+ OIC integrations?
7	**Other Applications**
7.1	Do you have capability of Supporting and Implementing Windchill PLM

PROPOSAL EVALUATION PROCESS

Onto Innovation will employ the following steps in the Proposal Evaluation Process.

Step 1: Vendors will sign a Non-Disclosure & Confidentiality Agreement (NDA).

Step 2: Onto Innovation will issue a Request for Proposal requesting vendor proposals based on current and planned services needed.

Step 3: Onto Innovation will host a set of conference calls to field vendor questions in preparation for final RFP response.

Step 4: Vendors will formally respond to the RFP, addressing all the requirements specified in this document. Responses are due by the deadline specified in this document. If at any time during this process, you decide not to respond to this RFP, please contact Onto Innovation immediately and return the RFP. All responses are the property of Onto Innovation and will remain valid for a period of 180 days from such deadline.

Step 5: Vendor response, presentations and prototype can be held in Onto Innovation, Wilmington, MA offices, or via an online meeting (i.e. Zoom).

Step 6: Onto Innovation will select a qualified vendor based upon the final proposal that provides the greatest benefit and based upon discretionary review and assessment. Onto Innovation may present the vendor with a standard Onto contract applicable to the type of product and/or service being offered by the vendor. Onto Innovation reserves the right to make an award based solely on the vendor proposals or to negotiate further with one or more vendors.

Step 7: An ONTO Master Professional Services Agreement (MPSA) will be provided after selection. The selected vendor will have the opportunity to review and discuss proposed changes prior to signing the agreement.

DUE DATES

A written confirmation of the Vendor's intent to respond to this RFP is required by 2/14/25. All proposals are due by 3/7/25. Any proposal received at the designated location after the required date specified for receipt shall be considered late and non-responsive. Any late proposals will not be evaluated for award.

Throughout this RFP process, all inquiries to, and meetings with, Onto Innovation personnel will be scheduled through the Kumar Subramaniam. Any contact or attempted contact concerning this RFP with any Onto Innovation personnel without prior approval of Onto Innovation will be considered an attempt to exert undue influence on the RFP process and may, in Onto Innovation' sole discretion, result in immediate disqualification.

Please submit an electronic copy of your responses to Kumar Subramaniam. at the contact information listed above.

- Onto Innovation will accept responses to this RFP until 3/7/25 5:00pm EST
- Onto Innovation is under no obligation to accept a response if it is not received by the RFP Response Due Date above.

You shall provide the Onto Innovation Associate with the name, phone number, and the e-mail address of a contact person within your organization responsible for your RFP Response. Onto Innovation will review any questions from you about this RFP and provide answers as promptly as possible. Questions should be e-mailed to the Onto Innovation Associate. Onto

Innovation will only respond to questions originating from your designated contact person. Onto Innovation will accept questions concerning this RFP until 2 days before deadline of response submission. Responses will be provided via e-mail or Q&A conference calls.

By submitting a response to this RFP, you represent that you have read and understood this RFP and that your response is made in accordance with this RFP. Onto Innovation reserves the right to:

- Accept, reject, or not respond to any and all responses to this RFP.
- Change or terminate its requirements to this RFP at any time, in its sole discretion.
- Add, modify, or delete any items in this RFP at any time with notification to the participants.
- Negotiate additional items to be included in the response or delete items from the response; and
- Extend or modify any date stated herein.

Where you are asked to supply a response to a requirement or asked to use a specific approach, you must state if you will comply, but also how you will comply. Please state any material assumptions made in formulating your proposal. Failure to provide a response to an item will be treated as an inability to support that item. Where a statement of non-conformity is provided, you must indicate your reasons for doing so, describe your proposed alternative, and explain the impact and benefit to Onto Innovation from your proposed approach.

YOU MUST PERFORM YOUR OWN EVALUATION OF ALL INFORMATION AND DATA PROVIDED BY ONTO INNOVATION. YOU ACKNOWLEDGE THAT ONTO INNOVATION MAKES NO REPRESENTATION OR WARRANTY REGARDING ANY INFORMATION OR DATA PROVIDED BY ONTO INNOVATION.

This RFP and the information contained herein are proprietary and confidential and shall be maintained in strict confidence by the recipient. This information may only be used for the purpose of preparing a formal response for Onto Innovation, Inc.

Any proposal received at the designated location after the required date specified for receipt shall be considered late and non-responsive. Any late proposals will not be evaluated for award.

ONTO reserves the right to:

- Reject any or all offers and discontinue this RFP process without obligation or liability to any potential Vendor,
- Accept other than the lowest priced offer,
- Award a contract based on initial offers received, without discussions or requests for best and final offers, and
- Award more than one contract.

PROPOSAL SUBMISSION

Vendor's proposal in response to this RFP will be incorporated into the final agreement between ONTO and the selected Vendor. The RFP has been structured to minimize the effort required to respond, and to provide ONTO with a good understanding of commercial software capabilities. To support this, we request that Vendors be clear and concise and follow the prescribed response format. In terms of format, submitted proposals are suggested to include each of the following sections:

1. Executive Summary
2. Overall Support Approach
3. Response to RFP Detail
4. Detail Cost Estimate
5. Appendix A: Company Overview
6. Appendix B: References
7. Appendix C: Staffing Structure

RFP RESPONSE REQUIREMENTS

Executive Summary

This section will present a high-level synopsis of your company (size, geographic locations, type of customer supported) and your overall core competencies.

Overall Approach

This section should include a high-level overview as to your approach for supporting our requirements.

Response to RFP

Each requirement is described and numbered. We will look for your approach to satisfying these requirements

Pricing

This section should include a detailed breakdown of your pricing structure.

Appendix A: Company Overview

Please provide a detailed overview of the company including, but not limited to:

- Official registered name (Corporate, D.B.A., Partnership, etc.), Dun & Bradstreet Number, Primary and secondary SIC numbers, address, and main telephone number.
- Key contact name, title, address (if different from above address), direct telephone and email addresses
- Person authorized to contractually bind the organization for any proposal against this RFP.
- Top five reference companies which you provide equivalent services for.

Appendix B: References

ONTO will require contactable references from two corporate clients for whom provide equivalent support services for, ideally those in a similar business as Onto Innovation, deployed to a global market. Please provide client contact information as well as an explicit explanation of the services you provide.

Appendix C: Support Staffing

Please provide biographies and relevant experience of key staff and management personnel. Describe the qualifications and relevant experience of the staff that would be assigned to initiative by providing biographies for those staff members.

Appendix D: Onto IT Organization supporting ERP

- Arjun Dubbaka – Had of Enterprise Applications
    - Babu: Plan to Manufacture and Supply Chain Management
    - Sonam: Sales and Service
    - Shyam: Record to Report
    - Doug: Legacy SAP resource, moving to support Oracle
    - Hire 1: Logistics, Spare Parts Planning
    - Hire 2: Mobile Field Service

EVALUATION FACTORS FOR AWARD

Criteria

Any award to be made pursuant to this RFP will be based upon the proposal with appropriate consideration given to operational, technical, cost, and management requirements. Evaluation of offers will be based upon the Vendor's responsiveness to the RFP and the total price quoted for all items covered by the RFP.

The following elements will be the primary considerations in evaluating all submitted proposals and in the selection of a Vendor or Vendors:

- Completion of all required responses in the correct format.
- The extent to which Vendor's proposed solution fulfills ONTO's stated requirements as set out in this RFP.
- An assessment of the Vendor's ability to deliver the indicated solution in accordance with the specifications set out in this RFP.
- The Vendor's stability, experiences (with multi billions revenue in a semiconductor's space is preferred), and record of past performance in delivering such solutions.
- Overall cost of Vendor's proposal.

Onto Innovation may, at their discretion and without explanation to the prospective Vendors, at any time choose to discontinue this RFP without obligation to such prospective Vendors.
